

Advance solar panel Syria

Where does solar energy come from in Syria?

The use of solar energy spreads from northwestern Syria, which started relying on solar power around 2016, passing through areas in the north-east, ending with the areas under the control of the Syrian regime, which directed a clear trend to generate electricity through them, not only in large industrial facilities but even in homes.

Are solar panels a better option than losing electricity in Syria?

According to an opinion poll conducted by Enab Baladi, a number of Syrians residing in various governorates considered that alternative energy through solar panels is a better option than losing electricity despite its high costs and regardless of the controlling parties.

Are solar panels a viable alternative energy source in Syria?

As an option that seemed to be one of the best alternative energy sources in Syria, reinforced by the absence of fuel, the spread of solar panels began in most regions, respectively, years ago, amid "government" support and adoption of this trend.

How much does a solar panel cost in Syria?

The price of a panel capable of charging a small battery and lighting a room is about 80,000 Syrian pounds, regardless of its quality, while the monthly salary of her husband, who is an employee in an agricultural establishment affiliated with the Syrian regime, is about 110,000 Syrian pounds.

Is Syria a good country for solar energy?

Regarding wind energy, which is the second source of energy, Syria is not considered one of the countries that have a sufficient amount of wind throughout the year to produce electricity, and therefore the solar energy situation is regarded as the best in it.

How to install solar energy in Damascus?

Nidal Hafez, Director of Services Departments in Damascus Governorate, said that a citizen who wants to install solar energy must submit a request to the governorate to organize its installation on the roofs of buildings of common ownership, and the Services Directorate determines the area in which he/she can install.

Solar array mounted on a rooftop. A solar panel is a device that converts sunlight into electricity by using photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light. The electrons flow ...
