Issue / Feature Tracker; Downloads; For Minecraft 1.17 and newer, head to the new website. 64k ME Storage Component: Largest storage component, used to ...

External Storage¶. To use other blocks as storage, attach a Storage Bus to it and increase the priority. (click the little cog in the top right) This way, AE2 will treat this Storage as if it was a Storage Cell, reading the contents, showing them in your Terminal and prefer that as an input.(useful if you don't want to have an item on your drive AND an external Storage)

P2P Tunnel or "Point to Point Tunnels" are a versatile configurable system to move items / redstone / power / and fluids from one location to another through an existing ME Network without storage.. Tunnels are 1 input to N outputs. This means you can output to as many points as you want, but only input at a single point per tunnel.

A 1k Storage Cell can store over 8k of a single item or up to a little over 4k items if you have the maximum of 63 different item types (item stack sizes don't matter). A RS 1k Storage Disk can store 1,000 items without any other restrictions or intricacies. Sub-Networks: Many of AE2's Sub-Network mechanics are used to get around channel ...
