

# Are you tired of storing energy

What does it mean if you are fatigued or lack energy?

When most people say they are fatigued or lack energy, they are describing a condition called central fatigue or brain fatigue. They mean that they are having trouble paying attention, concentrating, or feeling motivated to perform. They may also feel sleepy.

Is your energy fleeting?

So often, energy feels fleeting. Tired of being tired? Every decision and daily task builds or takes away from a person's energy reserves, says Emily Marszalek, Employee Wellness specialist at the University of Alabama at Birmingham. "Like a phone battery, we all start with a certain percent of energy when we wake up," Marszalek said.

Is fatigue a real thing?

But fatigue is slightly different. When you're fatigued, you have unrelenting exhaustion that lasts longer than normal tiredness, and it's usually not helped by getting rest, the Mayo Clinic says. "Symptoms of fatigue can include low energy, feeling unmotivated, or feeling unfocused," says Dr. Waters.

Does energy flow through the body?

Columbia Mitochondrial Psychobiologist and Associate Professor of Behavioral Medicine Martin Picard, PhD, discusses the importance of using a different scientific approach focusing on how energy flows through the body to examine our health, especially the lack of energy many people experience.

Does fatigue have to be constant?

"Fatigue does not have to be constant, it can fluctuate." .. If you're wondering why you're always tired, it could be a sign of a serious medical condition. Here are some common causes, plus how to treat fatigue, per Experts.

What if I feel tired a lot?

1. Rule out health problems. Fatigue is a common symptom of many illnesses, including diabetes, heart disease, arthritis, anemia, thyroid disease, and sleep apnea. Talk to your doctor if you feel unusually tired. Many medications can contribute to fatigue. These include some blood pressure medicines, antihistamines, diuretics, and other drugs.
