

# Armenia renewvia energy

What is Armenia's Energy Policy?

According to the International Energy Agency, imports of oil and gas continue to cover 75% of Armenia's energy needs. However, the Government of Armenia has focused its energy policy towards developing indigenous energy sources, mainly renewable, and on replacing the country's main nuclear reactor.

What percentage of Armenia's Energy is renewable?

Renewable energy resources, including hydro, represented 7.1% of Armenia's energy mix in 2020. Almost one-third of the country's electricity generation (30% in 2021) came from renewable sources. Forming the foundation of Armenia's renewable energy system as of 6 January 2022 were 189 small, private HPPs (under 30 MW), mostly constructed since 2007.

Why does Armenia need a single energy supplier?

Armenia relies on imports of natural gas and oil for most of its energy needs, which exposes it to supply risks and dependence on a single supplier. As the government considers energy security and the development of indigenous sources to be of prime importance for the energy sector, renewables and efficiency measures are key areas.

How much energy does Armenia produce in 2021?

In 2021, Armenia produced 7.7 TWh of electricity, of which natural gas covered 44% (3.4 TWh), hydro and other renewables 30% (2.3 TWh) and nuclear 26% (2.0 TWh). In the Caucasus region, Armenia is the only country producing nuclear energy. Armenia's energy demand averages more than 3 Mtoe (3.59 Mtoe in 2020).

Where does Armenia get its energy from?

Lacking indigenous resources, Armenia imports natural gas and oil for most of its energy needs (78.6% of total energy supply in 2020), mainly from the Russian Federation (hereafter, "Russia").

How much energy does Armenia need?

It has been an observer to the Energy Community since 2011 and a member of the Eastern Partnership since 2009. Although Armenia's energy demand averages more than 3 Mtoe (3.59 Mtoe in 2020) and the country does not produce any fossil fuels, it manages to cover 27% of energy demand with domestic energy production.

Renewvia Energy currently has 22 operating minigrids throughout Kenya and Nigeria with upwards of 12 additional sites under construction. Our Minigrids are providing clean, reliable energy to a growing number of communities in these ...

Renewvia Solar Energy PLC, the Ethiopian subsidiary of Renewvia Energy Corporation, will be implementing the solar mini grid project as awarded by DREAM in four sites in the Oromia Region: Huluku
