

Aruba battery backup for server

How does Aruba's cloud backup service work?

With Aruba's cloud backup service, it's you who chooses the source and destination for your data. In fact, as well as the option of making backups of your cloud servers or physical servers, you can decide where to store your data by choosing from the data centers in Aruba's European network.

Where can I store my data in Aruba?

In fact, as well as the option of making backups of your cloud servers or physical servers, you can decide where to store your data by choosing from the data centers in Aruba's European network. Manage backups to Aruba's Cloud with an easy-to-configure tool or a more comprehensive solution.

Does Aruba central support backup?

Aruba Central (on-premises) supports backing up of system information, group configuration data, alerts, events, audit trail, sites, labels, and historical reports. You can backup Aruba Central data either manually or set a schedule for an automatic backing up of the data.

How do I backup Aruba central data?

You can backup Aruba Central data either manually or set a schedule for an automatic backing up of the data. Before backing data, you must have a file server configured and ready to save the backup file. Backups consume large amounts of space (up to 5 terabyte). Make sure you have sufficient space for a successful backup operation.

How do I schedule automatic backups in Aruba?

Then, once you have installed a backup agent, you can schedule your automatic backups in the dedicated admin console. With Aruba's cloud backup service, it's you who chooses the source and destination for your data.

How do I restore backed up data in Aruba Central on-premises?

To restore the backed up data, complete the following steps: In the Aruba Central On-Premises app, set the filter to Global. Under Maintain, click System Management. The Backup and Restore page is displayed. In the Restore pane, click the Restore Now menu option. The Restore window opens.

The Policy Manager WebUI uses server-side session caching during add or edit workflows, so performing add or edit actions on the same server from different tabs of the same browser can lead to data loss and impact network access. ...
