

Average household energy storage price per 10kWh in Poland

How much does electricity cost in Poland?

The average price of electricity since 2007 reached its maximum, EUR0.2162kWh, in December of 2023 and its minimum price, EUR0.1131 kWh, in June of 2009. The difference between the price of electricity with and without taxes is EUR 0.1047 tax for each kilowatt hour, thus, 49.57% of what households pay for electricity in Poland.

Should energy storage be installed in Poland?

A properly selected storage facility is able to power the entire house for at least a dozen or so hours. It is worth emphasising that photovoltaics alone will not fulfil this task, even during a sunny day. The rationale for installing energy storage is also influenced by the state of the power grid in Poland.

Is Poland a key player in Europe's energy storage sector?

Poland is emerging as a significant player in Europe's energy storage sector. The recent capacity market auctions in December 2024 highlighted a substantial shift towards BESS, with approximately 2.5 GW secured by new generation capacity market units, predominantly Li-ion energy storage projects.

What does ENEX 2025 tell us about energy storage in Poland?

The insights from Enex 2025 reinforce that BESS is no longer an emerging trend--it's a critical part of Poland's energy transition. With favorable market reforms and growing investment interest, the country is well-positioned to capitalize on energy storage innovations.
