

# Average nickel manganese cobalt battery price per 250MW in Vietnam

Why did NCM battery cell prices drop in May?

Asian nickel cobalt manganese (NCM) battery cell prices fell to their lowest level for the first time in over three years in May, retreating significantly from the peak seen in 2022. A combination of lower critical battery raw material prices, supply glut, a sluggish demand and improving technology has kept a tight lid on NCM [...]

How much does cobalt cost in 2022?

For example, the price of cobalt has fallen from roughly \$70,000 per metric ton in 2022 to about \$30,000 in 2024. Similarly, the price for lithium carbonate has fallen from a high of approximately \$70,000 per metric ton to well below \$15,000 in 2024.

How many tons of nickel a year is mined in China?

Accordingly, the expected mining output is 118 thousand tons of nickel concentrate, investing and putting into operation 2 nickel factories with a total output of about 8,000 - 11,000 tons/year. Closed loop value chain
