

# Average solar plus storage price per 300MW in Vietnam

How much does a solar plant cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MOIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region.

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

How much solar power does Vietnam have?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024. Last year's new additions totaled around 79 MW. This content is protected by copyright and may not be reused.

How will Vietnam's new energy storage scheme help investors?

Supa Waisayarat, Vietnam's adversary consultant at Thailand's Super Energy Corporation, noted that the new scheme supports the adoption of storage and provides developers and investors with more transparent pricing, which could encourage more power purchase agreements (PPAs) and improve financing confidence.

Vietnam needs to consider the development of battery energy storage system (BESS) while the country is on a path towards promoting renewable energies to ensure energy ...

The average annual reduction rates are 1.4% (Conservative Scenario), 2.9% (Moderate Scenario), and 4.0% (Advanced Scenario). Between 2035 and 2050, the CAPEX reductions ...

## Average solar plus storage price per 300MW in Vietnam

The rapidly evolving landscape of utility-scale energy storage systems has reached a critical turning point, with costs plummeting by 89% over the past decade. This ...

Vietnam's Ministry of Industry and Trade (MOIT) has unveiled a revised feed-in tariff (FIT) framework for solar power, incorporating location-based pricing and, for the first ...

Vietnam's power sector has been expanding alongside its economy--at USD223.9 billion in 2017--one of the 20 fastest growing in the world with year-over-year growth rates ranging from above 5 percent per year to 7.1 percent ...

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

Under the draft, solar and wind power projects with energy storage systems connected to the national power grid will enjoy several preferential policies. These projects will be prioritized for electricity dispatch as ...

In 2024 YTD, residential PV-plus-storage systems in California had a median system price of \$3,159/kWh, or \$5,783/kWac (\$5,473/kWdc)--up by 4%--16% from 2023 depending on the ...

For example, in 2014, the reported capacity-weighted average system price was higher than 80% of system prices in 2014 because very large systems with multiyear construction schedules were being installed that year. Developers of ...

The Solar+Storage Power Purchase Agreement NV Energy's solicitation for solar capacity was designed specifically to attract solar+storage projects. The PPA structure pays a price during ...

Key Takeaways for Generation Costs Across Select Southeast Asian Countries The LCOE for solar PV and wind varies significantly across the ASEAN member states. The existence of high ...

Levelized cost: With increasingly widespread implementation of renewable energy sources, costs have declined, most notably for energy generated by solar panels. [3][4] Levelized cost of ...

The report adopts a two-pronged approach to estimate the cost of Li-ion based MW scale battery storage systems in India. The report takes the case of solar projects in ...

The eighth National Power Development Plan (PDP8) has taken into account the high integration rate of renewable energy into the power system with a goal that Viet Nam's power system will have 2,700 MW storage of ...

The plan also called for 300MW of battery storage deployment and 2,400MW of pumped hydro energy

## Average solar plus storage price per 300MW in Vietnam

storage (PHES) by 2030. State-owned public power company Vietnam Electricity (VE), is participating in a ...

The recent plunge in global module prices leveled off, staying around \$0.11/Wdc in Q1 2024. In Q4 2023, the average U.S. module price (\$0.31/Wdc) was down 5% q/q and down 22% y/y, but ...

A well-organized solar auction in Vietnam in 2019 could result in power purchase agreements with prices of US\$0.055-0.065/kWh over 25 years (in levelized real terms and with an appropriate ...

The eighth National Power Development Plan (PDP8) has taken into account the high integration rate of renewable energy into the power system with a goal that Viet Nam's ...

This project, developed by Vietnam Electricity (EVN) in collaboration with the Asian Development Bank (ADB), Rocky Mountain Institute (RMI), Global Energy Alliance for ...

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the lowest cost. This approach has ...

Berkeley Lab's annual Utility-Scale Solar report presents trends in deployment, technology, capital expenditures (CapEx), operating expenses (OpEx), capacity factors, the levelized cost of solar ...

To achieve this goal, a transition to green and clean energy is essential. According to World Wildlife Fund Vietnam (WWF-Vietnam), Vietnam's solar energy is evaluated as having high development potential renewable ...

Future changes in crude oil prices remain highly uncertain. In this study, the crude oil price, as referred to Japan's average import price (nominal dollars per barrel), is assumed to increase ...

This legal update signals a significant step forward in aligning Vietnam's renewable energy sector with standardized pricing mechanisms and broader energy policy goals.

Solar PV module prices have fallen by 80% since the end of 2009, and PV increasingly offers an economic solution for new electricity generation and for meeting energy service demands, both ...
