

Average solar with battery price per 500kW in Australia

How much does a solar battery cost in Australia?

A guide to solar battery prices and value. Solar battery prices have come down significantly with the introduction of the federal government rebate. The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries.

How much does a 10 kWh solar battery cost in Australia?

The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries. A newer technology, battery storage has been viewed as expensive - especially when comparing the payback of a battery system against its expected life.

How much does a solar battery cost?

Thanks to falling prices and the federal battery rebate, thousands of households can now expect payback within the warranty period, particularly if they use a lot of power at night or join a Virtual Power Plant. In summary: Price Range: Popular solar batteries have an installed cost between \$8,000 and \$13,000 including the federal rebate.

Are solar panels a good investment in Australia?

These savings figures are for new panel and battery systems: Throughout Australia, average payback times on solar panel and battery systems range from 6.2 years to 10.1 years. The economics are far more attractive in some states like South Australia, Queensland and Western Australia.

How can Australia reduce the cost of solar battery?

Australia offers various incentives that can significantly reduce the cost of solar battery: Federal Government's Cheaper Home Batteries Program (effective July 1, 2025): This national initiative offers an upfront discount of approximately 30% or up to \$372 per usable kWh of battery capacity.

Are batteries worth it in Australia?

We've been tracking the financial return of batteries in Australia for over a decade and regularly update our analysis of whether batteries are worth it. At the midway point of 2025 was a key turning point in this equation as the federal battery rebate was introduced which offers a discount of around 30% for a typical 10kWh battery.

10kW solar battery price from \$5,900. Compare Alpha, Sungrow & Tesla costs. Expert installation, warranties & rebates. Get your free 10kWh battery quote today.

Average solar with battery price per 500kW in Australia

Solar Battery Costs in Australia August 2025 Solar Choice publishes average prices regularly, ensuring consumers get the transparency on costs for popular brands. Below ...

How much do solar batteries cost? Solar battery costs vary significantly across brands. Different companies offer different battery sizes, so the easiest way to compare costs is to look at the price per kilowatt-hour ...
