Pele Green Energy develops, owns and operates renewable energy projects. We value operational involvement as it enables us to drive efficiencies in the delivery of power projects. We value doing this work as it enables us to leverage our knowledge of the local context to optimise the impact of each project we build, from the jobs created to the ...

Energy independence: By increasing the country's renewable energy capacity, solar projects can reduce dependence on imported energy sources and improve energy security. Lower energy costs: Solar power can be a more cost-effective energy source for the mine, especially in the long term, leading to reduced operating costs.
