Look no further than shopping online at Makro! At Makro, we specialise in providing a wide range of high-quality load shedding products that are designed to meet your specific needs.

Do you need load shedding solutions in South Africa?

Load shedding solutions that you can implement quickly and relatively cheaply is what most people in South Africa are in urgent need of. With no end in sight to load shedding in South Africa, people are desperate for easy solutions to avoid the impact of having rolling blackouts.

What is a load shedding kit?

At its most basic, a load-shedding kit is simply a DC battery, often contained in a portable power station with multiple output ports for convenience. This is coupled with a load shedding inverter that quickly converts the DC power contained in the battery backup into the AC electricity your home and appliances need.

What power options are available for a four-and-a-half-hour load-shedding stint?

Popular, more-affordable options that can power a few essential devices through four-and-a-half-hour load-shedding stints include inverter trollies and portable power stations. Our requirements were to power a Wi-Fi router, 55-inch TV, media streaming stick, and desktop PC. We only considered backup power solutions with lithium-ion batteries.

How to install a load shedding inverter?

As far as installation is concerned, you can either do a DIY installation which would involve connecting the inverter to the battery and power supply with the cables that are supplied with the load shedding kit. Alternatively you can connect it directly to the DB board which would require the services of a certified electrician.

A model-driven load shedding solution incorporates power system topology with Dynamic Load Priority tables to automatically analyze and track the system changes with a fast-acting response to disturbance triggers. All with objective to preserve critical process by saving essential loads and protect against production loss while maintaining service continuity, system uptime, and ...
