Will a floating wind project boost La Réunion's Energy Independence strategy?

The introduction of a floating wind project in La Réunion promises a substantial boost in renewable energy capacity, vital for the island's energy independence strategy.

Could Réunion be the first region to send food and energy?

"If there's climate-change problems, or war, or any political conflict in the world, Réunion wouldn't be the first region where people would think to send food or energy," says Jean Philippe Praene, who studies renewable energy at the University of La Réunion in Saint Denis. "So we have to be as self-sufficient as possible."

Does La Réunion have a floating wind sector?

La Réunion's insular setting necessitates the development of a local floating wind sector, poised to create numerous job opportunities during construction and operation phases. Floating offshore wind, tailored to the island's geography and weather patterns, capitalizes on its deep offshore waters.

Why is Réunion so worried about energy imports?

Part of this concern stemmed from Réunion's over-reliance on imports, including for energy, says Russeil, who is now at the French National Research Institute for Agriculture, Food and Environment in Paris.

Which islands have achieved complete energy self-sufficiency?

So far, only very small islands such as El Hierro in the Canary Islands have achieved complete energy self-sufficiency, says Dominique Grondin, who studies energy engineering at the University of La Réunion.

MISSION : ridurre il consumo energetico e migliorare l'efficienza di immobili e impianti industriali, al fine di contribuire alla salvaguardia dell'ambiente e alla riduzione delle emissioni di gas serra. In particolare, l'obiettivo è quello di fornire soluzioni innovative e tecnologicamente avanzate per il controllo dei consumi energetici, al fine di ridurre i costi e migliorare la ...

Mujtaba Haider Khan is the CEO of Reon Energy Limited, the largest industrial solar solutions provider in Pakistan. Reon is a part of Dawood Hercules Group. Mujtaba took over the company reins in October 2016 and has managed to turn around the decentralized solar market's landscape in the past 16 months.
