The secret behind the Workhog battery performance is the Ironclad Effect - the increased work capacity of the EnerSys square tubular plate when compared to round tube and flat plate battery designs. Ironclad square tubes provide more surface area on the positive plate, exposing more positive plate active material to the electrolyte.

To make the benefits of TPPL technology available to a greater number of powersport enthusiasts, EnerSys ® recently added three of the most popular sizes for powersport vehicles to the ODYSSEY ® battery portfolio. The three models, ODS-AGM14 (Group size BTX14), ODS-AGM20L (Group size BTX20L) and ODS-AGM30L (Group size BTX30L), are ...

Made from 99.99% pure lead, CYCLON battery plates are extremely thin, so they offer more surface area than conventional batteries and far more power. High purity acid is absorbed right into the Absorbed Glass Mat (AGM) plate separators, so the CYCLON battery provides leak-proof operation in any position.
