

What are fire resistant storage cabinets?

Safety storage cabinets with extreme fire resistance for high risk areas are our prime focus: We offer the appropriate fire resistant cabinets - free standing units or under counter units - across a range of sectors such as pharmaceutical, academia, industrial and agricultural, providing safe and legally compliant storage.

Are flammable storage cabinets GS-tested?

All products in our range of flammable storage cabinets are also GS-tested and guarantee compliance with the requirements of EN 14470-1. asecos is certified to EN ISO 9001 and EN ISO 14001. Depending on the model, the cabinets are additionally tested in accordance with FM standard 6050 and UL/ULC standard 1275.

Are Ion-line cabinets fire resistant?

In addition, all models of the ION-LINE offer fire resistance for more than 90 minutes when exposed to fire from the inside-out. In accordance with TRGS 510, the cabinets are classified as a storage section - the specifications of VdS 3103:2016-05 are thus met. ION-LINE cabinets are available in two widths (120 cm, 60 cm) depending on the model.

How long can Ion line cabinets last in a fire?

ION-LINE cabinets are available in two widths (120 cm, 60 cm) depending on the model. In a fire, every second matters. In many regions outside Europe, sheet steel cabinets are considered acceptable if they protect the flammable contents for about 10 minutes in case of fire. Could you evacuate your facility in 10 minutes? How about 90 minutes?
