

Cheapest MW scale storage system installation offer in Vietnam

Is a large-scale battery energy storage system (Bess) being deployed in Vietnam?

Steps forward have been taken for the first pilot deployment of large-scale battery energy storage system (BESS) technology in Vietnam.

Can energy storage help Vietnam meet climate goals?

Co-funded by a grant from U.S. Mission Vietnam, the pilot project will demonstrate how energy storage can help Vietnam integrate more renewable energy into its power system to meet ambitious climate goals.

Is a battery energy storage system coming to Vietnam?

15 October 2021 - Vietnam's pilot utility-scale battery energy storage system [BESS] will soon take shape in Khanh Hoa Province after an agreement was signed today between AMI AC Renewables and the U.S. Consulate in Ho Chi Minh City to formalize a US\$2,962,000 grant from the latter to develop the project.

How much does a Bess system cost in Vietnam?

In 2023, EVN PECC3 estimated that the cost for a 2 MWh BESS system was 360-420 USD/kWh, and that the investment would require electricity prices in Vietnam above 18 UScent/kWh to be profitable - this is twice the current levels. However, BESS costs are declining rapidly.

Can solar energy storage be commercially viable in Vietnam?

The purpose of the pilot project is to demonstrate the commercial viability of energy storage in Vietnam, a country which has rapidly adopted solar PV in the past few years, but is yet to start doing the same for batteries, or other forms of energy storage technology.

Will Vietnam develop 300 MW of Bess by 2030?

Vietnam's current goal of developing only 300 MW of BESS by 2030 appears modest, but the figure does not include systems coupled to rooftop solar systems. To foster a resilient, efficient, and sustainable energy future, Vietnam should aim high.
