What is the Energy Management Maturity Model for China?

Table 4. Energy management maturity model for China. EnMS is not established. Some EnMS processes are established. SEUs are partly managed. EnMS is formally established based on ISO 50001 processes. No energy sources within the scope and boundaries are excluded. EnMS is certified and demonstrated to be effective through recognition schemes.

What is the law of China on energy conservation?

Law of the People's Republic of China on Energy Conservation Measures for the Administration of Energy Conservation in Significant Energy Users The Revolutionary Strategy for Energy Production and Consumption (2016-2030 Announcement of the First Batch of Energy Management System Certification Bodies

What is the current policy for em standardization in China?

The current policy for EM standardization in China needs to be specified here. In fact, national standards on EM have shown increasing conformance with the ISO standards under the policy of adopting ISO standards to be the identical national standards.

What is the next meta-standard for ENMs in China?

It is almost certain that the next meta-standard for EnMS in China will keep consistency with the newly revised version of ISO 50001. Thus, the process model adopted by this study was based on ISO 50001:2018 to ensure better applicability in the next few years.

What makes em excellence in China so important?

The vast majority of case firms have officially established an EnMS with a certificate according to the firms' profiles. Thus, operating with a certified EnMS can be regarded as one of the main features of EM excellence in China.

Is ISO 50001 a good EM standard?

However, a consensus is emerging in the global academia that an EnMS standard like ISO 50001 is by no means an ultimate theoretical framework without defining the depth and breadth of EM activities (Finnerty et al., 2018a). Its limitations lie in at least two aspects.
