

Congo Republic aura power

How much power does the Democratic Republic of the Congo have?

The Democratic Republic of the Congo has reserves of petroleum, natural gas, coal, and a potential hydroelectric power generating capacity of around 100,000 MW. The Inga Dam on the Congo River has the potential capacity to generate 40,000 to 45,000 MW of electric power, sufficient to supply the electricity needs of the whole Southern Africa region.

What is the energy potential of the DRC?

The DRC has immense and varied energy potential, consisting of non-renewable resources, including oil, natural gas, and uranium, as well as renewable energy sources, including hydroelectric, biomass, solar, and geothermal power.

Does Congo have a potential for renewable power generation?

As mentioned earlier, the country possesses a significant potential for renewable power generation, which is illustrated further as follows : Hydropower: For which the Congo River is the main source, with an average flow rate 42,000 m³ /s. Biogas: Coming mainly from both plant and animal waste.

Is the Democratic Republic of the Congo an energy exporter?

One of the Inga dams, a major source of hydroelectricity in the Democratic Republic of the Congo. The Democratic Republic of the Congo was a net energy exporter in 2008. Most energy was consumed domestically in 2008. According to the IEA statistics the energy export was in 2008 small and less than from the Republic of Congo.

What is the Congo Energy Atlas?

This Atlas was created by the UNDP, Netherlands Development Organization SNV, and the Congolese Ministry of Water Resources and Electricity. It has 600 interactive maps and informs policymaking on decentralizing energy and encourages further renewable energy investments.

How many people live in the Democratic Republic of the Congo?

2010 population figures were 3.8 million for the RC compared to CDR 67.8 Million. The Democratic Republic of the Congo has reserves of petroleum, natural gas, coal, and a potential hydroelectric power generating capacity of around 100,000 MW.

Aura Power is currently developing solar farms in Canada, USA, Italy, Portugal, Lithuania, Republic of Ireland, Spain and the UK. We have secured 1,300 MW of grid capacity and successfully taken 630 MW through planning. As well as providing clean renewable energy, our solar farms offer a number of benefits to local people and wildlife.
