Nicaragua: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

The 10 New Insights in Climate Science 2023/2024 report called for urgent climate actions and commitments at national and international levels. Following this credible guidance, the Global Tipping Points report launched at the 28th meeting of the Conference of the Parties examined the risks and opportunities of negative and positive Climate Tipping Points ...

Conrad Energy was set up as a flexible energy generator in 2016, helping to balance the grid when renewables can't meet demand. Our drive to do this in a more environmentally friendly way has led to huge investment in new, greener technologies such as batteries and in software to make processes more efficient - saving money and reducing carbon.
