Does Jinko Solar work with Athens Airport?

Leading Chinese manufacturer JinKo has unveiled a number of new products at last week's Intersolar Europe 2024 event in Munich, including its work with the Athens airport. Here, PV Tech speaks to Frank Niendorf, vice president of JinKo Solar EU, about the company's growing global footprint, and compliance with sustainability criteria.

Who is Jinko Solar?

JinKo Solar is also the first company in the industry to be awarded with this certification for silicon ingot manufacturing, silicon wafer cutting, solar cell manufacturing and solar module manufacturing.

Does Jinko Solar have a market share in Europe?

Europe is one of the most strategic core regional markets for JinKo Solar. For the last years we consistently followed a market penetration strategy, which means we heavily invested to grow our EU market share steadily. By 2024 I expect us to exceed a 20% market share in Europe.

Is Jinko a game-changer for renewables?

Certainly one of the most important strategic investments of JinKo is to take the next steps beyond modules entering the energy storage system (ESS) business. In our opinion ESS is the critical game-changer for taking renewables to the next level.

Which market segments should Jinko be positioned in?

Given JinKo's size, market share and market leading position it is critical for us to be well positioned in all the three market segments: residential, commercial and industrial (C&I) and utility-scale projects. All those three market segments will play a key role to reach the EU's renewable energy targets.

JinkoSolar has published its financial results for the third quarter of the year, which include the shipments of over 23.8GW of modules. JinkoSolar launches Tiger Neo 3.0 range of TOPCon modules ...

JinkoSolar serves more than 200 countries, is a global leader in photovoltaic sales, and pioneers "vertical integration" in production. JinkoSolar owns 10+ globalized manufacturing bases. JinkoSolar actively shapes industry standards, contributes to international frameworks, and promotes diverse applications of photovoltaic technology.
