

Cuba solar leading

What if Cuba had built out more solar power?

Cuba's large-scale blackouts that left 10 million people without power this month wouldn't have happened if the government had built out more solar power to boost its failing electric grid as promised, some experts say.

Does Cuba need a redesigned energy sector?

Concerns over Cuba's dependence on Venezuela are translating into the need for a fundamentally redesigned energy sector and more flexibility for investors. The pandemic has accentuated Cuba's need to diversify and move from oil-generated energy to renewable sources of energy (RES).

Can solar power solve Cuba's energy problems?

In a nation with plentiful sunshine, Cuban officials have long had the opportunity to encourage solar power as one solution to national energy problems. But October's sweeping outages -- the island's worst power failure in years -- show little progress has been made.

Is Cuba a good candidate for solar?

Besides the strong sunlight, there is another way that Cuba is a good candidate for solar. A significant share of its electricity comes from smaller power plants distributed around the country. Solar could be added or switched out in those locations. But it hasn't happened yet.

Could more solar power boost Cuba's electric grid?

By ALEXA ST. JOHN, INGRID LOBET and ANDREA RODRIGUEZ HAVANA (AP) -- Cuba's large-scale blackouts that left 10 million people without power this month may not have happened if the government had built out more solar power to boost its failing electric grid as promised, some experts say.

Should Cubans buy solar panels paired with batteries?

The minister of energy and head of the nation's electric utility encouraged Cubans to buy rooftop solar systems paired with batteries, instead of the gas and diesel generators purchased by Cubans who can afford them.

Solarcollab's Fast Track Landowner and Community Owned Solar Farm program in Cuba, New Mexico leverages Fintech protocols on the blockchain that allows us to be able to develop these solar projects in a low cost model so that we can offer equity shares of the solar project to the landowner and local community.

A 100 MW solar farm could generate about 150 GWh per year. However, in Cuba, solar parks are small and scattered, driving up construction costs and reducing operational efficiency. To achieve the additional 8,000 GWh annually, approximately 5,400 MW of solar panels would need to be installed, requiring an investment of around \$5.4 billion.

Cuba is reportedly boosting the use of photovoltaic solar energy, and is carrying out two projects since early 2024 to add 1,000 megawatts in two years to the national power grid, looking at adding the same amount of generation by 2031. Alfredo Lopez, general director of the state-run energy company Union Electrica (UNE), told Granma newspaper that ...

The solar panels are suitable for both for domestic and commercial systems and for distribution throughout the country. It's a win-win situation." The output will increase coverage to some 130,000 people. In order to encourage the transition to solar energy, the Cuban government is heavily subsidizing the cost of the PV panels and solar heaters.
