

Deon energy Turks and Caicos Islands

Does Turks and Caicos have a policy on energy efficiency?

Turks and Caicos has few policies related to energy efficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-efficient technologies.

Could ocean thermal energy help Turks and Caicos meet its peak demand?

Once wave and ocean thermal technologies are proven in the marketplace, ocean energy and ocean thermal energy conversion have potential as well. Abundant wind and solar resources, as well as the potential for other renewable sources could help Turks and Caicos meet or exceed its peak demand of 34.7 MW.

What is the energy landscape in Turks and Caicos?

The energy landscape in Turks and Caicos is complex and dynamic. Fortis TCI, while acknowledging the challenges, is proactively addressing them through a combination of strategic investments, technological innovation, and a commitment to sustainability.

How much does electricity cost in Turks and Caicos?

The 2015 electricity rates in Turks and Caicos are \$0.29 per kilowatt-hour (kWh), slightly below the Caribbean regional average of \$0.33/kWh. Like many island nations, Turks and Caicos is almost 100% reliant on imported fossil fuel, leaving it vulnerable to global oil price fluctuations that have a direct impact on the cost of electricity.

Who regulates the electricity sector in Turks and Caicos?

Four main entities are responsible for governing the electricity sector in Turks and Caicos. The governor grants and revokes licenses, regulates the level and structure of tariffs that electric companies can charge for various customer groups, and approves changes to these regulations.

Is a quiet storm brewing in the Turks and Caicos Islands?

In the sun-drenched Turks and Caicos Islands, a quiet storm is brewing--the escalating demand for electricity. As this British Overseas Territory experiences rapid economic growth, fuelled by tourism, real estate, and government investments, the need for reliable, affordable, and sustainable energy has never been more critical.

Speaking on the MOU, the Honorable Goldray Ewing, minister of home affairs, public utilities and transportation said, "TCIG is committed to developing a clean energy future for Turks and Caicos Islands that will decrease the islands' reliance on imported fossil fuel, reduce the cost of electricity for households and businesses, and ...
