

Does Djibouti get electricity from Ethiopia?

There have been power interconnections with Ethiopia in recent years, and this has accounted for about 46 per cent of the country's guaranteed electricity production (REEEP, 2012). According to the power sharing agreement, Djibouti only receives surplus energy when Ethiopia has an excess (AfDB, 2013).

How can Djibouti achieve its energy goals?

Djibouti's substantial potential for geothermal electricity generation, along with its rising capacity to produce energy from wind and solar power plants, should help the country reach its goals in coming years. In addition to the growing need for generation capacity, the expansion of renewable energy is key for Djibouti to diversify its economy.

How many people in Djibouti have access to electricity?

In Djibouti, 42% of the population has access to electricity. The government's Vision 2035 establishes goals to promote renewable energy source use for electricity generation and to pursue fuel-switching measures from fossil to renewables.

What are the main sources of energy in Djibouti?

Traditional biomass fuels, petroleum products and electricity have a significant share in the country's energy mix. AFREC 2020 energy balance shows that the total primary energy supply in 2018 was 457 ktoe. Djibouti has no indigenous sources of oil, natural gas, hydropower or coal.

Who regulates electricity in Djibouti?

The Ministry of Energy and Natural Resources is in charge of the energy sector and is also the sector regulator (Table 5). The 'lectricit' de Djibouti (EDD) is the sole generator, transmitter and distributor of electric energy. On a regional level, the country is a member of the East African Power Pool. An Electricity Law is under preparation.

Does Djibouti receive surplus electricity?

According to the power sharing agreement, Djibouti only receives surplus energy when Ethiopia has an excess (AfDB, 2013). Total electricity production in 2015 was 31 ktoe and final consumption of electricity in the same year was 29 ktoe (Table 2) (AFREC, 2015). Key consumption and production statistics are shown in Figures 2 and 3.

Djibouti: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
