

Is the Comoros transitioning to res?

The Comoros, like Madagascar, Mauritius, and Reunion, has recently focused its efforts on the transition to renewable energy sources (RES) throughout its territory. This paper provides policymakers with a comprehensive overview of the energy situation in the Comoros.

What is the cost of electricity in the Comoros?

The cost of electricity in the Comoros is 298 USD/MWh for the consumer, despite the high production cost of approximately 595 USD/MWh. The population is ready to pay for access to electricity.

How will the Comoros Islands be affected?

The Comoros Islands could be affected by the energy review through extreme events such as natural disasters, volatility of oil prices, socioeconomic energy risks, or geopolitical instability.

Should Comoros invest in solar energy?

The Comoros has significant potential for the development of photovoltaic energy (\*\*should they invest in it\*) given its economic situation. Recently, a French company signed a contract with SONELEC to purchase electricity from solar energy for 26 years.

Should Comoros abandon its monolithic energy governance?

Comoros, like many small islands, should consider changing its monolithic energy governance due to its structural heaviness. The territory needs to adapt quickly to face the challenges of transition. Comoros's energy vulnerability is threefold.

Is the Comoros fully electrified?

The Comoros is not yet fully electrified. In the case of the Comoros, the territory does not have systematic access to drinking water and its level of development is very low with an HDI of 0.503 for the year 2017.
