Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

What are the top 5 energy storage companies in 2024?

Top 5 companies including BYD, General Electric, LG Energy Solution, Siemens and Samsung held a market share of over 40% in 2024. Many market players are operating in U.S. energy storage industry and players are working to develop cost-effective and wide range of ESS.

Why is the energy storage industry growing?

The U.S. energy storage industry has been observing remarkable growth due to increasing demand for efficient battery storage from different sectors such as EV, renewable energy and many more. This is pushing numerous innovative initiatives in the industry. Solid-state batteries, gravity-based ESS are some of the innovations in the field.

How do I evaluate potential revenue streams from energy storage assets?

Evaluating potential revenue streams from flexible assets, such as energy storage systems, is not simple. Investors need to consider the various value pools available to a storage asset, including wholesale, grid services, and capacity markets, as well as the inherent volatility of the prices of each (see sidebar, "Glossary").

What technologies are used in energy storage systems?

**TECHNOLOGY RISKS:** While lithium-ion batteries remain the most widespread technology used in energy storage systems, these systems also use hydrogen, compressed air, and other battery technologies. The storage industry is also exploring new technologies capable of providing longer-duration storage to meet different market needs.

How much money does energy storage make in 2022?

The U.S. market for energy storage reached USD 64.9 billion, USD 81.9 billion and USD 106.7 billion in 2022, 2023 and 2024 respectively. The pumped hydro technology battery uses excess electricity to pump water from lower to upper reservoir. The technology offers longer duration storage.
