CONTEXT. In 2010 the Government of Cape Verde had the vision of achieving 50% penetration of renewable energy by 2020. In order to be able to realize this vision it was necessary to create renewable energy storage capacity, being pumped-storage the most efficient way to store large amounts of energy.

The project was a huge success and to this day remains one of the most important and influential strategic studies in the energy sector of Cape Verde. The Renewable Energy Atlas includes the strategic identification of resource potential, location and analysis of the solar, wind, pumped-storage, geothermal and wave resources, and resulted in ...
