Is MACSE a risk-averse investment in Italian energy storage?

From ESS News 2025 is set to see rapid growth in investment in the Italian energy storage sector, led by battery energy storage systems (BESS), with the implementation of MACSE. The eagerly anticipated procurement exercise will offer a stable, predictable premium over 15 years, making it particularly attractive for risk-averse investors.

How will the MACSE policy support mechanism work in 2025?

2025 is set to see the start of a surge in Italian storage asset investment, led by BESS. The catalyst for this is the implementation of the new MACSE policy support mechanism, offering 15 year indexed contracts on up to 100% of asset capacity.

Can ESS projects participate in the MACSE auction?

ESS projects which form part of solar-plus-storage sites, alongside solar projects, can participate in the auction. Any changes to the corporate structure of companies participating in the Macse auction, whether they occur after the deadline for applying to participate or after projects are allocated, must be communicated "promptly" to Terna.

How will MACSE tender targets affect Bess investors?

MACSE tender targets will adapt to the zonal need for storage, but market inefficiencies in predicting fundamental value drivers (e.g., RES buildout, lack of flexibility, interconnection constraints) will likely create locational merchant upside for BESS investors.
