What does EPs mean on an inverter?

EPS is power going out of the inverter to power any connected loads. That's why they show a plug and an outlet (as well as call it &quot;Backup Power&quot;). Depending on how the inverter is configured, PV will come into the inverter and power the loads (EPS) first.

What is an EPS for solar?

An EPS for solar allows you to simply flick a switch and enjoy an uninterrupted power supply while you wait for your power company to restore the supply! What is EPS or Emergency Power Supply for Solar? Have you heard of EPS (emergency power supply) functionality for a solar system?

What happens if an inverter is cut - EPs or no EPs?

1) EPS or no EPS,if there is a power cut,the inverter will shut down completely. This is to protect any power line workers that may be working on them. As you can imagine,without this,the power lines could become energised by solar producing homes and that could be an unwelcome shock to someone who will assume the power is off!

How much power does an EPS Inverter Supply?

You'll also need to be careful about what you turn on when in EPS mode. The EPS can supply up to 5kwof power (approx. 20A in the UK). If you draw more than this (say you have the oven on and then switch on the kettle and microwave),the inverter will overload and shut down requiring it to be reset in order to continue working again.

What is emergency power supply (EPS) for solar?

Emergency power supply (EPS) for solar is a battery function that works to keep your home's lights on during a blackout. Most solar panel systems will automatically disconnect from the grid when it goes down,to ensure the panels don't send electricity through power lines and electrocute the engineers who are working on them.

What is EPs & how does it work?

EPS functionality gives a home or business owner access to the energy stored in the battery in the event of grid failure. These features can be used to continue to power the essential circuits in your home or even the entire home in the instance of a power cut.
