

Estonia energy management company

Where is Eesti Energia located?

Eesti Energia AS is a public limited energy company in Estonia with its headquarters in Tallinn. It is the world's biggest oil shale to energy company. [citation needed]The company was founded in 1939. As of 2014, it operates in Estonia, Latvia, Lithuania, Finland, Jordan and Utah, United States.

What is the biggest energy project in Estonia?

The largest ongoing energy project in Estonia is the desynchronization of the Baltic States from the BRELL grid shared with Belarus and Russia and synchronizing with continental Europe through Poland. The synchronization of the Baltic States' power system with the Continental European Network is expected to be completed by 2025.

Who owns Eesti Energia?

The main raw material for energy production - oil shale - is extracted from mines located in Eastern-Estonia and owned by the company. The group of Eesti Energia has three main operation areas: electricity generation, shale oil production, and sale and distribution of electricity. Its shares are owned by the Government of Estonia.

Who sells electricity in Estonia?

In Estonia's electricity market, Eesti Energia is the largest seller with a 60% market share and owns the largest distribution network, representing 86% of the distribution market. The Estonian Competition Authority (ECA) regulates transmission and distribution rates, as well as connection charges. Electricity in 2020:

Where does Estonia's energy come from?

The rest of Estonia's generation is from other renewable fuels. Wood-based fuels were the second largest source of power in 2016. The rest comes from waste and other biofuels, as well as a small amount of hydropower.

When was Eesti Energia founded?

Eesti Energia was founded in 1939. In 1998, it was reorganized from the state enterprise to a private limited company. In 1998-1999, two distribution companies (Läänemaa Elektrivõrk and Narva Elektrivõrk) were separated from Eesti Energia and privatized.
