

Expected ROI of BESS project in Belgium 2026

Which Bess projects are being developed in Belgium?

ENGIE is also developing two other BESS projects in Belgium, for which permits have already been obtained: Kallo (100 MW /400 MWh) and Drogenbos (80 MW /320 MWh). BESS Vilvoorde aligns with ENGIE's commitment to developing large-scale flexibility solutions, crucial for integrating renewable energy production.

When will Engie be launching a Bess project in Belgium?

The project will be executed in two phases: the commissioning of 100 MW of batteries in September 2025, followed by an additional 100 MW in January 2026. ENGIE is also advancing two other BESS projects in Belgium, located in Kallo (100 MW /400 MWh) and Drogenbos (80 MW /320 MWh), for which permits have already been obtained.

When will Bess Vilvoorde be remunerated?

This milestone follows the project's construction permit in July 2023 and its selection for capacity remuneration in October 2023. With an installed capacity of 200 MW on a 3.5-hectare site, BESS Vilvoorde will be able to store 800 MWh of energy in 320 battery modules measuring 25 m x 4 m x 3 m, and release it to the grid for four hours.

Which ENGIE projects are advancing in Belgium?

ENGIE is also advancing two other BESS projects in Belgium, located in Kallo (100 MW /400 MWh) and Drogenbos (80 MW /320 MWh), for which permits have already been obtained. BESS Vilvoorde is a testament to ENGIE's commitment to developing large-scale flexibility solutions, crucial for the integration of renewable energy.

When will Bess Vilvoorde be launched?

BESS Vilvoorde will be launched in two phases, with the commissioning of 100 MW of batteries in September 2025, and a further 100 MW in January 2026. ENGIE is also developing two other BESS projects in Belgium for which the Group has already obtained permits, in Kallo (100 MW /400 MWh) and Drogenbos (80 MW /320 MWh).

When will Engie's Bess project start?

The project will be launched in two phases, with the first 100 MW of batteries commissioned in September 2025 and the remaining 100 MW in January 2026. ENGIE is also developing two other BESS projects in Belgium, for which permits have already been obtained: Kallo (100 MW /400 MWh) and Drogenbos (80 MW /320 MWh).

That trend is expected to continue. In 2026/27, the average pack price is expected to fall below \$100/kWh,

Expected ROI of BESS project in Belgium 2026

based on raw material costs, competition, and pressure from ...

In autumn 2024 two draft regulations were published regarding state aid for large-scale electricity storage systems (BESS), one from the Modernisation Fund ("MF ") 1 - and the second under the National Recovery ...

This article explores various financing options for a 270MWh BESS project in Belgium, guiding investors and developers through the complexities of securing funding for this ...

Engie begins BESS construction in Vilvoorde, Belgium The project will have the capacity to store 800MWh of energy, enough to power 96,000 households.

Romania aims to have at least 2.5 GW of battery energy storage systems (BESS) in operation by next year and to surpass 5 GW of capacity by 2026 under a plan that is ...

A truly profitable BESS investment isn't just about upfront costs-- it's about maximizing revenue, minimizing risk and ensuring long-term financial returns. The right decision-making framework ...

The rapid growth rate of energy storage in the MENA region, led by the GCC, is surprising many analysts. Saudi Arabia, in particular, is set to be the third biggest global BESS market after the USA and China in 2026.

French state-backed utility Engie has broken ground on the second of the battery energy storage systems (BESS) awarded it by Belgian grid operator Elia under a national plan to procure more grid electricity. Elia ...

This project, located on the Antwerp refinery site, will benefit from the available land and the site's grid connection. It is a new step in TotalEnergies' development of battery ...

The global energy storage market is expected to add over 220 GWh of new capacity in 2025, driven by a rise in tenders for BESS projects, many of which may be ...

Learn how to calculate the economics of BESS and your ROI. A practical guide for businesses and projects investing in battery energy storage systems.

2023 ribbon cutting for Ruien, a 25MW/100MWh by Belgian energy minister Tinne Van der Straeten (centre), one of the existing BESS projects handed a contract through the CRM auction. Image: Tinne Van der ...

Discover how commercial BESS monetizes peak shaving, ancillary services, and carbon credits. Learn ROI drivers for energy storage systems in C& I applications.

How much does it cost to build a battery in 2024? Modo Energy's industry survey reveals key Capex, O& M, and connection cost benchmarks for BESS projects.

Expected ROI of BESS project in Belgium 2026

BESS Revenue Models German BESS revenues fell below 100 EUR/kW/yr in Q1"2024 due to mild winter and weak gas prices. By Q3, revenues recovered above 150 ...

The role of a broker A key component in maximizing the ROI from your BESS is the role of the energy broker, also known as an aggregator or Balance Responsible Party (BRP). The broker's primary responsibility is to ...

The European Market Outlook for Battery Storage 2025-2029 analyses the state of battery energy storage systems (BESS) across Europe, based on data up to 2024 and ...

This article analyzes the financial landscape of large-scale BESS projects in Belgium, focusing on the complexities and potential pathways to success in this rapidly ...

IRR Definition: Internal Rate of Return (IRR) represents the discount rate at which the Net Present Value (NPV) of a project's cash flows equals zero, offering insights into ...

On July 5th, ENGIE commenced construction of one of Europe's largest Battery Energy Storage Systems (BESS) at its Vilvoorde site in Belgium. This achievement follows the project's construction permit acquisition in July ...

Similar to last year, battery energy storage systems (BESS) made up almost all new-build capacity selected in recent Capacity Remuneration Mechanism (CRM) auctions in ...

A render of the BESS project in Germany. Image: Kyon Energy. Developer Kyon Energy has claimed the largest approved BESS in Europe for a 275MWh project in Germany, just as regulators extend grid fee ...

Green Turtle, situated on the Rotem industrial site in Belgium's northwestern Limburg province, was originally planned as a 600 MW battery storage park for renewable ...

The majority of newly installed large-scale electricity storage systems in recent years utilise lithium-ion chemistries for increased grid resiliency and sustainability. The capacity of lithium ...

BNEF modelled forecast scenarios reflecting both that planned 2026 rise in Section 301 tariffs, as well as a potential extra 10% hike on top, and a more extreme outlook reflecting a 60% tariff rate being placed on battery racks ...
