

# Expected ROI of domestic energy storage project in Vietnam 2025

Why is the demand for battery energy storage systems accelerating in Vietnam?

Export-oriented businesses, especially in manufacturing, are under growing pressure to meet stringent requirements. At the same time, the demand for battery energy storage systems (BESSs) is accelerating, driven by Vietnam's abundant renewable energy (RE) potential, particularly in solar and wind power.

Why do we need battery energy storage systems in Vietnam?

At the same time, the demand for battery energy storage systems (BESSs) is accelerating, driven by Vietnam's abundant renewable energy (RE) potential, particularly in solar and wind power. However, owing to the intermittent nature of these energy sources, storage solutions are required to ensure continuous electricity supply.

Is Vietnam a good market for energy storage solutions?

Vietnam represents a promising market for German and European small and medium-sized enterprises (SMEs) specialising in energy storage solutions, thanks to their technical expertise and established reputation in RE technologies.

How much power will Vietnam have by 2045?

In Vietnam, the draft Power Plan 8 sets a target that by 2030 the electricity storage capacity of the system will reach 2400MW with stored hydroelectricity. By 2045, the total cumulative storage and storage capacity will increase to 28,950 MW nationwide. Construction of the discharge tunnel section 3 of Bac Ai hydropower plant

How a Bess project is promoting energy storage in Vietnam?

Encouraging domestic enterprises to invest in new technologies will promote the growth of the energy storage industry in Vietnam. Investment in BESS projects in Vietnam is attracting the attention of international partners due to the country's strong potential for RE development.

How can the next chapter in Vietnam's energy story build on early successes?

The next chapter in Vietnam's energy story can build on early successes while adapting to key learnings and evolving market dynamics. Paige Nguyen serves as Director of IEEFA's Asia team, leading the organization's strategy, research, and communications efforts across the region.

From the perspective of enterprises, Mr. Vo Le Duy Duc - Director of the Key Accounts Division at VINENERGO Energy Joint Stock Company - emphasized that the ...

Explore Vietnam's wind power industry in 2025: key government policies (PDP VIII, FiTs), major domestic (Trung Nam, BIM) and foreign (Siemens Gamesa, CIP) companies, and significant onshore & offshore wind power ...

# Expected ROI of domestic energy storage project in Vietnam 2025

The Vietnamese government has issued a series of decrees to implement the 2024 Electricity Law. The decrees took effect from the date of their issuance, and ...

As part of the plan to contribute to the renewable energy transformation towards sustainable energy industrialization, on January 23, 2025, Stavian Energy Solutions and Stavian Industrial Park also held a ceremony to ...

Last week, our Managing Director Thomas Jakobsen joined two high-level panels at the annual Solar & Storage Live Vietnam 2025, sharing practical insights into ...

Significant investment is also occurring in the UK, where work is set to begin on the world's first commercial liquid air energy storage project in 2025, in addition to a number of BESS, pumped hydro storage, hydrogen ...

Vietnam's government has approved the adjustment of the National Power Development Plan for the 2021-2030 period, with a vision to 2050 (PDP8). The revision sets ...

Looking ahead: Keys to success Several factors will define the energy storage market in 2025: the continued dominance of LFP chemistry and its downward impact on pricing, increased utility demand for integrated ...

The Vietnamese government has issued a series of decrees to implement the 2024 Electricity Law. The decrees took effect from the date of their issuance, and replaced/revoked several decrees, including decrees recently ...

Despite being mentioned as the mainstream power source in the future, renewable energy still has weaknesses in terms of stability and ability to ensure the safety of the power transmission ...

WASHINGTON, D.C., April 29, 2025 - Today the American Clean Power Association (ACP), on behalf of the U.S. energy storage industry, announced a historic commitment to invest \$100 billion into building and buying American ...

Experts predict what 2025 holds for U.S. energy policy: EV battery costs fall, energy storage demand surges, carbon removal hits scale, permitting reform in D.C.

We're definitely seeing increased domestic manufacturing in energy storage. Some manufacturers have always focused on energy storage, while others, traditionally ...

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the lowest cost.

# Expected ROI of domestic energy storage project in Vietnam 2025

As Vietnam braces for a significant surge in electricity demand, projected at 12%-13% by 2025, the country is simultaneously witnessing an influx of investments in the renewable energy sector.

The Government of Vietnam and the International Partners Group (IPG) have identified 24 energy projects as eligible for support under the Just Energy Transition ...

The Government has stipulated a series of investment incentives to promote the development of renewable and new energy, including exemptions from land use and land ...

Vietnam's e-Commerce sector is expected to reach US\$25 billion by 2025. Digital travel, transportation, food services, and media sectors in Vietnam are experiencing rapid growth.

The India Energy Storage Alliance (IESA) projects a fivefold growth in the sector between 2026 and 2032, with investments expected to reach INR4.79 lakh crore by 2032.

Vietnam's solar energy market, driven by high solar potential and strong government support, plays a key role in the country's "Net Zero" commitment, among other ...

The development of energy storage systems like BESS is crucial for addressing these challenges. Future outlook for Northern Vietnam solar projects and clean energy ...

Government investment and green energy investment funds such as JETP are strategically directed towards renewable energy sources, including solar, wind, biomass, hydrogen energy, and efficient energy storage ...

Image: Wood Mackenzie / ACP Grid-scale storage deployments alone are expected to reach 13.3 GW in 2025. Across all segments, Wood Mackenzie expects 15 GW of storage deployments, growing another 25% over ...

24 Mar 2025 B& Company Energy B& Company is the first Japanese company specializing in market research and investment consulting in Vietnam since 2008. In this section "Vietnam Briefing", young researchers of B& Company will ...

The U.S. Department of the Treasury released additional guidance on the Inflation Reduction Act's domestic content tax credit bonus for solar and battery energy storage ...
