

Expected ROI of portable ESS system project in Spain 2026

Why do we need battery energy storage systems in Spain?

Due to the large capacity of installed hydroelectric and thermal storage systems and the resilience of the Spanish power grid, the need for Battery Energy Storage Systems (BESS) in Spain has been relatively low. The lack of a clear regulatory framework for BESS has also hindered its development in Spain so far.

What is Spain's regulatory framework for energy storage?

Spain's regulatory framework for BESS is set in its Strategy for Energy Storage. The Strategy identifies the required regulatory measures - such as grid access, market structure, and addressing double tolling - that are currently needed to ensure the deployment of a solid energy storage market.

Does Spain need a Bess energy system?

Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country. As a result, the need for BESS to integrate renewable energy sources into the electricity system is less immediate than in the UK, for example.

How many Bess projects are there in Spain?

In March 2025, UK companies Renewco and Atlantica announced the development of up to 2.2GW of BESS projects across Spain. Other projects in the pipeline primarily involve storage co-located with solar or wind generation. According to BloombergNEF, the total capacity currently in the BESS pipeline is around 3GW.

Will ERDF funds support storage deployment in Spain?

The recent approval of the use of the European Regional Development Fund (ERDF) funds to support the storage deployment in Spain opens the door for a first batch of around 2GW distributed in close to 100 projects, heavily supported by public financing.

What is the current situation of the Spanish Bess market?

The current situation of the Spanish BESS market confirms that both of these factors are required to gain market attraction: Despite a high penetration of renewable energy, the Spanish regulatory framework has been lagging and the first BESS projects of significant size have yet to be built.

European Market Outlook for Battery Storage 2024-2028 17 June 2024 SolarPower Europe has published its new "European Market Outlook for Battery Storage", ...

This report concludes that storage systems are not profitable under the current Spanish regulatory framework, where the revenues are obtained in short-term markets:

Expected ROI of portable ESS system project in Spain 2026

4 · The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...

Our Commercial & Industrial energy storage system is a customized solution integrating battery packs, BMS, PCS, EMS, auto transfer switch, etc. It offers energy ranging from 50kWh to 1MWh and covers most of the commercial and ...

Energy storage systems in Spain are a key element in the fight against climate change, as they help us to address the challenge of the energy transition. These systems make renewable ...

China is expanding its influence in the global energy storage system (ESS) market by leading with lithium iron phosphate (LFP) batteries. Unlike electric vehicles, which prioritize reduced size and weight, ESS remains ...

Eligible projects will be judged on economic viability, their capability of helping to integrate renewable energy on the grid, and the creation of local employment and business opportunities as part of their development.

"We have a common objective to improve Spain's grid resilience and support the market's ambitious energy storage growth targets," said Isaac Garcia Moreno, Executive Director of BW ESS.

[Review of 2024 | The "Most" of Global ESS Projects and Orders] Global demand for energy storage is accelerating rapidly. On one hand, the selling prices of ESS ...

These projects will be owned equally by BW ESS and Ibersun. The partners expect each project to achieve Ready-to-Build status within two years and anticipate pursuing ...

BW ESS and Ibersun have formed a joint venture to develop 2.2 GW of utility-scale battery energy storage system (BESS) projects across Spain under the first phase of their new partnership. ...

Network charges are not based on the costs users impose on the system using long-run marginal cost (LRMC) pricing but rather set to recover the financial needs of network firms. Import ...

Renewable energy projects in Spain are helping to decarbonise the economy, create green jobs, and reduce reliance on fossil fuel imports. We explore the current landscape of renewable energy in Spain, highlighting key ...

Spanish wholesale markets have offered increasing revenues due to recent price volatility which rewards BESS through power trading. However, sustained investment in batteries will be ...

Expected ROI of portable ESS system project in Spain 2026

The EU Market Outlook for Solar Power 2022-2026 contains an updated forecast for the EU solar market in 2022 and projections of the evolution of the market through 2026.

A project in BW ESS' 211MW Sweden portfolio. Image: BW ESS / Ingrid Capacity. Owner-operator BW ESS and developer Ibersun have entered into a partnership to develop and deploy 2.2GW of BESS projects in Spain. ...

The 45 battery and thermal energy storage projects allocated European Union subsidies will add more than 779 MW/3.4 GWh of capacity to the Spanish grid.

[SMM Analysis] Spanish renewable energy company Greenergy plans to invest 3.5 billion euros in battery energy storage systems (BESS) and PV-ESS projects by 2027, a move that will drive significant growth for the ...

The global energy storage market added 175.4 GWh of installed capacity in 2024, with the three major regional markets--China, the Americas, and Europe--continuing to ...

Global energy storage owner-operator BW ESS has partnered with Spanish developer Ibersun to launch a joint venture that will deliver 2.2 gigawatts (GW) of utility-scale ...

Under the assumptions of the exercise, Spanish GDP - which grew by 2.5% in 2023 - is expected to slow to a growth rate of 1.9% in 2024, with this figure holding steady in 2025, before again ...

"The MENA region - the next hot market for energy storage?" I asked in an article back in October 2017. It took a bit longer than I expected, but seven years later it's time to replace the question mark with an exclamation ...

Energy Storage System Roadmap for India 2019-32 Energy Storage System (ESS) is fast emerging as an essential part of the evolving clean energy systems of the 21st century. Energy ...

The Spanish government, in their final meeting of 2017, authorised modifications in its agreement with the Basque regional government to move Spain forward in its process to become a full member of the European ...

The top 10 energy storage manufacturers in Spain show strong strength and potential in technological innovation, market expansion and project implementation, and are expected to continue to lead the global energy ...
