Metal Protective Cabinets by Safety Technology International. Telephone: +44 (0) ... Fire Safety Search is the complete industry solutions guide to the fire protection of assets and life. Focusing only on fire safety and fire ...

Safety cabinets for flammable and combustible liquids meet NFPA 30 standards to reduce the risk of the contents igniting in the event of a fire or as a result of environmental conditions. The cabinets are red or yellow to indicate the cabinet contents to first responders.

Safety cabinets keep dangerous liquids organized, labeled, and separate from work areas. Local and state fire codes often require chemicals to be stored in a safety cabinet to reduce the risk of fire and ensure workers have time to evacuate. Cabinets are often color-coded to help workers and first responders visibly identify cabinet contents.

NFPA and OSHA require flammable cabinets to be designed and constructed to specific requirements. Per 1910.106(d)(3)(ii), storage cabinets must be designed and constructed to limit the internal temperature to not more than 325°F when subjected to a 10-minute fire test. We are in compliance with this standard.

Should Flammable Safety Cabinets Be Vented? Justrite flammable safety cabinets are designed to meet NFPA  
30 code requirements. All cabinets include dual vents with built-in flame arresters with bungs, usually located  
on the side of a cabinet: one high and one low. The vents typically accommodate a two-inch NPT threaded  
rigid steel pipe.
