

Floor standing battery tender price in Poland 2026

How many battery projects are being built in Poland?

The Polish Transmission System Operator Capacity Market auction has awarded a 17-year contract, indexed to inflation, for four battery projects to European Energy. The four projects have a combined capacity of 114 MW and are located in the north-western part of Poland. European Energy has 24 months to bring the projects to the ready-to-build stage.

Is Poland moving towards battery energy storage systems (BESS)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

How much does a 2028 electricity contract cost in Poland?

The auction which took place last month (December 2023) cleared at a fixed, consumer price-indexed (CPI) price of PLN 244.90/kW (US\$61.73) per year for the contracts which start in 2028, the Polish state bulletin revealed yesterday (9 January). The contract lengths range from 1 to 17-years.

How many GWh of energy storage capacity will Poland have by 2035?

In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage capacity by 2035. Its plans involve more than 80 projects, the value of which is estimated at around PLN 18 billion (\$4.7 billion).

Will PGE supply ESS batteries in 2026?

On Monday, LG Energy Solution confirmed that it had signed an agreement with PGE to supply 981 MWh of grid-scale ESS batteries between 2026 and 2027. It also noted that the project will be supplied with locally manufactured grid-scale lithium iron phosphate batteries at LG Energy Solution's production facility in Poland.
