When the solar facility produces less energy than needed, the balance is drawn from the grid or Diesel

Generator solar for home DR Congo

generator. The facility remains connected to the grid as it was before. The customer receives bills from S4A Solar for the lower-cost kWh and from the utility for the balance, at the same rate as before.

If your average gas generator costs about \$1000 a similar output solar generator is going to cost you somewhere close to \$2000 - and maybe even more. Solar generators have lower operating costs in the long haul to offset that initial expense, but it still a pretty big hit to your bank account right away.
