

What is luxpower / home assistant?

New comments cannot be posted and votes cannot be cast. I have this fully working , search GitHub for LuxPower their is a python script to access the data via Matt. Once home I will post links. Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts.

Where is the luxpowertek integration hosted?

The LuxpowerTek integration is hosted in a private repository by Guy Wells. This refresh only works for the LuxPowerTek integration referenced above. The service name and function call format are hard-coded. The location of the refresh button can be set with the `refresh_button_location` config value. There are 4 accepted values for this config:

What is a luxpowertek power distribution card?

A simple power distribution card of an inverter and battery system, for Home Assistant. The card is modelled after LuxpowerTek's app and website. This card has been added to the list of default HACS frontend elements. Search for the name on HACS, and download from there to install. The following is a list of configs for the card:

Where can I find a lux power sensor in ha?

This can be found on the Lux website at server.luxpowertek.com Once you have added this into HA, you should see some sensors in HA: Use Developer Tools to view `sensor.luxpower`. Initially, the state will be `Waiting` but after a few minutes when the inverter pushes an update the state will change to `ONLINE` and data will be populated in the attributes.

How do I set up a luxpower datalogger?

Open a web browser to your datalogger IP (might have to check your DHCP server to find it) and login with username/password `admin/admin`. Click English in the top right click Network Setting in the menu. You should see the network settings, the top one is populated with LuxPower's server IP Address, the second one we can use.

How do I install a luxpowertek card?

The card is modelled after LuxpowerTek's app and website. This card has been added to the list of default HACS frontend elements. Search for the name on HACS, and download from there to install. The following is a list of configs for the card: NOTE: Please refer to the example config below for clarification on how the entities should be added.

Looking to integrate luxpower ac battery inverter into home assistant - i see a guy on these forums found some code to get it working but hes not responding - anyone done this please ? ... so any suggestions on what battery

Home assistant luxpower Croatia

work well with home assistant via this Lux integration would be appreciated. GNL (Graham) November 7, 2022, 1:39pm 76. Hi Guy.

Looking to integrate luxpower ac battery inverter into home assistant - i see a guy on these forums found some code to get it working but hes not responding - anyone done this please ? ... Please share with me. Home Assistant Community Luxpower ac inverter integration? Third party integrations. Longtran (Long tran) July 6, 2023, 4:42pm 142 ...

Good afternoon, i do hope that the personal issues are sorted and you are ok. I emailed i think last Friday and another person did that let me know, but i hadn't previously posted on here to let you know i was emailing. I wondered if you may have received my email. No rush at all as its obviously your personal time you are using to help people with but i just wondered if ...

Looking to integrate luxpower ac battery inverter into home assistant - i see a guy on these forums found some code to get it working but hes not responding - anyone done this please ? ... Firstly, excellent work on the Luxpower integration with HA and kudos for the effort put in to get this done. I too have a luxpower 5kW inverter and would ...

I'm looking for a good lux sensor for outdoor to control my shutters when the sun is shining in the windows. I have now some cheap chinese zigbee lux sensors which are on batteries. But I'm looking for a sensor that I can control with an ESP8266/ESP32 board. So I don't need to use batteries. I have found a few: TSL2591 MAX44009 VEML7700 I don't have found ...

Very valid point. Furthermore it claims to be able to extract the data irrespective of the connectivity to the Luxpower server environment. With Solar Assistant and Luxpower currently it uses the WiFi module of Luxpower to get the data, i.e. as far as I understand is that the WiFi module will only be active once it has been set up with their servers.

I am seriously considering EG4 equipment for my system and i am glad that it can integrate with home assistant because I will be doing a bit with home assistant later on.

The time card is using a time-picker-card. The save and reset buttons are using a button-card. The battery level (the purple slider in the top right hand corner) is using a mushroom-number-card set to a slider. The current settings which are displayed under the time-picker-card are mushroom-entity-card.. The table on the right are the Octopus Agile rates.

I am a bit confused about my automation. My automation should turn on some lights if the light is on in the living room and if the lux is under a given value. However, when value states is reached nothing happens. When I click run automation it runs as it should, but it does not fire automatically. Automation looks like this:
- alias: Skru på Blomsterlampe, Leimu og stue ...

Home assistant luxpower Croatia

Looking to integrate luxpower ac battery inverter into home assistant - i see a guy on these forums found some code to get it working but hes not responding - anyone done this please ? ... but would love to set up my Luxpower on it. Thx in advance! xitin0410 (lenguyen) July 7, 2024, 11:07am 246. I use lux LXP and want to connect to HA,, you can ...

Hi, I have a couple of Lux sensors throughout the house and have Hue lights everyone. I'm now building a Node-Red flow to turn the lights on when it's dark enough. But i have a problem, as soon as i turn on the lights, the LUX value in the room goes up, and the flow turns it back off on the next run. How do you handle this in flows?

Home Assistant Community Luxpower ac inverter integration? Third party integrations. shad0wca7 (Shad0wca7) December 8, 2024, 4:17am 284. Hello @guybw, sounds like you've done some impressive work. I've emailed you a request and would appreciate access. <- previous page. Home ...

Home Assistant Community Entity is non-numeric when state is "unknown" using built in Gauge card. Configuration. Scoff (Scott) January 14, 2022, 10:43am 1. Hi, still getting to grips with HA with no prior coding experience so please bear with me. I will try to explain the issue that I am seeing as clearly as possible.

Looking to integrate luxpower ac battery inverter into home assistant - i see a guy on these forums found some code to get it working but hes not responding - anyone done this please ? ... Hi All, I would just like to confirm that the solution to LXP integration into home assistant by Guy works a treat! I have been using it for a couple of ...

The best way to get this is fixed is by creating an Issue here: Issues · home-assistant/core · GitHub Make the SMA codeowner aware of this problem. Maybe this is already fixed on the latest pysma-library: I see that v0.3.5 is used at present in HA Core, on Pypi the latest version is v0.4.3.

Maybe it isn't an EG4 specific issue but a luxpower issue. I dont know. I think i have seen some EG4 reps commenting here and they could probably clarify. really like what I see with their equipment ... The Dongle in question updates to MQTT Every 1.5 Seconds once every 30 seconds it updates home assistant with the settings stored on the ...

Hi all, I'm a new Home Assistant user coming over to try and integrate the disparate monitoring systems I have for my home energy setup. I've just installed a Luxpower inverter and battery setup to add to my PV and Eddi diverter to try and build a more centralised monitoring system.

I already have some zigbee devices, and up until now I also had Phillips hue motion sensors SML002 outdoor. Our house is now being replastered, which would give me the opportunity to switch to wired devices, someone here has had good experiences. A minimum of 4 sensors are required (to cover all four sides of the house), preferably for each room's exterior ...

Home assistant luxpower Croatia

Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts. Perfect to run on a Raspberry Pi ...
