

What are Italy's energy storage goals?

Energy Storage Goals: To balance the grid with increased renewable energy, Italy targets 11 GW /58 GWh of grid-scale energy storage capacity by 2030, requiring substantial investment and development.

Should you invest in a capacity market in Italy?

The capacity market is well-suited to industrialised northern Italy with its developed infrastructure and higher industrial demand for power. While it offers 15-year contracts like MACSE, investors can stack their capacity payments (payments are then available when needed) on top of what they earn from selling energy in the wholesale market.

How much energy storage capacity does Italy have?

As of November 2024 Italy had 5.1 GW/11.7 GWh of energy storage capacity. This is almost exclusively small-scale residential system, with utility-scale storage systems providing just 864 MW. To help achieve the target for utility-scale storage build-out, the Italian government has implemented the MACSE subsidy scheme as supporting legislation.

How does Italy's electricity market work?

Zonal Market Dynamics: Italy's electricity market is a zonal market, with seven geographic zones affecting short-term price volatility and influencing BESS investment strategies. MACSE Subsidy Scheme: The new MACSE scheme offers 15-year contracts for energy storage projects and guarantees indexed linked revenue.

Why is Italy focusing on advanced storage technology?

In the broader EU landscape, where there's a collective push for 42.5% renewables in energy consumption by 2030, Italy's focus on advanced storage tech sets them apart from EU neighbours still heavily invested in traditional grid upgrades.

What is the EU energy storage programme?

It will be led by transmission system operator (TSO) Terna. The EU approved a EUR17.7 billion package to fund the programme in December 2023, and Terna is aiming for it to support the deployment of 50GWh of energy storage by 2030, which is lower than the initial 71GWh forecast.

The European Energy Storage Market Monitor (EMMES) updates the analysis of the European energy storage market (including household storage, industrial storage and pre-metre storage) and forecasts until 2030. The report covers ...

N2OFF Completes \$1.2 million of its \$2.7 million Total Commitment to Finance 196MWp Battery Energy Storage Assets in Italy Provided by GlobeNewswire Jul 11, 2025, ...

Similar to other renewable energy projects, the addition of construction bridge debt provides an additional source of capital to pay construction costs, but also adds complexity to the project financing of an ...

Search all the latest and upcoming battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Italy with our comprehensive online ...

With the first auctions for procuring new storage capacity in Italy expected in the second quarter of 2025, Aurora Energy Research has analyzed the internal rate of return for ...

Right now, battery storage projects aren't making enough money without some form of government support in Italy - that's why choosing between these market mechanisms is so crucial.

First up is the lithium-ion battery energy storage systems (BESS) phase, launching in early 2025, with pumped hydro energy storage (PHES) projects following in a subsequent phase.

The European Commission has given its approval for a support initiative aimed at funding extensive energy storage projects in Italy. These projects are intended to have a ...

2025 shifts the energy game: see why modular home batteries and TOU tariffs are reshaping Europe's storage market. Ultimati Energie brings scalable answers.

Why Italy's Energy Storage Policies Matter Right Now A country shaped like a fashionable boot, racing against time to store enough renewable energy before its pasta ...

Minister of the environment and energy security Gilberto Pichetto has signed a decree allowing Italy to proceed with its energy storage capacity auction, known as MACSE, in the first half of ...

In autumn 2024 two draft regulations were published regarding state aid for large-scale electricity storage systems (BESS), one from the Modernisation Fund ("MF ") 1 - and the second under the National Recovery ...

As such, we're providing this "Cheat Sheet for Energy Storage Finance" based on our work as buy-side and sell-side investment bankers experienced in both energy storage venture capital and project finance. I'm ...

A 2025 Update on Utility-Scale Energy Storage Procurements Addressing Tariffs and Trade in Energy Storage Projects The State of Play for Energy Storage Tax Credits Energy Storage Investments The Project ...

Italy accelerates the transition to renewable energy Italy is stepping into a new energy era with the MACSE auction in early 2025. Underpinning MACSE, or Meccanismo di Assegnazione Centralizzata per la ...

A 2025 Update on Utility-Scale Energy Storage Procurements Addressing Tariffs and Trade in Energy Storage Projects The State of Play for Energy Storage Tax Credits ...

Italy's Anie said the boost for small-scale energy storage systems provided by the country's renovation "superbonus" is over. The tax credit, which initially offered a 110% ...

Italy forecast to deploy more storage capacity than any other European nation in 2024 BW ESS, Emeren, Nuveen, Energy Vault, Octopus & Pacific Green among players to have made moves in Italian market in last year ...

A sun-drenched Italian village where solar panels gleam on rooftops, while giant battery systems hum quietly underground. By 2025, this could be Italy's new normal. As the ...

In the first quarter of 2024, the global energy storage market continued to show positive growth trends. Specifically in Europe, Germany, Italy, and Spain sustained rapid growth in their energy storage sectors. Notably, ...

The government aims to accelerate permitting for renewable projects and simplify environmental approvals while boosting storage deployment to support the integration of solar and wind power.

The European Market Outlook for Battery Storage 2025-2029 analyses the state of battery energy storage systems (BESS) across Europe, based on data up to 2024 and ...

MACSE is a new capacity auction which offers 15-year contracts for energy storage projects. The first MACSE auction will occur in the first half of 2025 and is a fundamental step in developing the build-out of BESS in Italy.
