

Hpe smart storage energy pack 1 firmware Qatar

What is the New HPE Smart Storage Battery?

A new HPE Smart Storage Battery (version 2) was introduced late in 2017 because the controller board in the Smart Storage Battery released with HPE Gen9 servers and used in early HPE Gen10 servers is now End-of-Life (EOL). HPE Integrated Lights-Out (iLO) firmware updates are not required for the version 2 battery to function correctly in a server.

Does the HPE smart storage hybrid capacitor support multiple devices?

The HPE Smart Storage Hybrid Capacitor is only supported on Gen10 and later servers. One energy pack option can support multiple devices. An energy pack option is required for 900 series controllers. Once installed, the status of the energy pack displays in HPE iLO.

What's the difference between energy pack and Smart Storage Battery?

NOTE: System ROM and firmware messages might display "energy pack" in place of "Smart Storage Battery." Energy pack refers to both HPE Smart Storage batteries and HPE Smart Storage Hybrid capacitors. Make sure that a supported Smart Array P-class Gen10 controller is installed. The installation is complete.

How do I install the energy pack?

Install the energy pack option. Route and connect the cable. Do not connect the energy pack while the server is operating. Verify that all power to the server has been removed. Install the fan cage. Install the access panel. Install the server into the rack. Connect each power cord to the server. Connect each power cord to the power source.

The HP Smart Storage Administrator (HP SSA) is a web-based application that helps you configure, manage, diagnose, and monitor HP ProLiant Smart Array Controllers and now other storage devices as well, such as host bus adapters (HBAs), HP Storage controllers, and future devices such as SCSI Express drives, and SAS switch devices. HP SSA replaces ...
