The datasheets all have similar stats and quotes them as same battery type (LiFePO4) so it's not obvious on the face of it but I would guess it's to do with battery life? The HV25 datasheet mentions 6000 cycles to 80% SOH but the same stat is not shown on the HV2600 datasheet (it also states 6000 cycles but the note just has "@90 DOD").
