

COP18 (27/11/12) -- Paul Fennell, Senior Lecturer on Carbon Capture and Storage at Imperial College, London talks about the process of carbon capture and storage and the important role ...

Imperial College London scientists have created a new type of membrane that could improve water purification and battery energy storage efforts. The new approach to ion ...

Programme Overview The MSc in Sustainable Energy Futures is an internationally unique programme. Throughout the year our students have lectures and guidance from experts across ...

Develop analytical skills in subsurface geoscience and engineering Join this 12-month Master's in Geo-Energy with Machine Learning and Data Science, ...

Applications are invited for a PhD studentship, to be undertaken at Imperial College London (Control and Power Group, Department of Electrical and Electronic ...

About Energy Futures Lab Energy Futures Lab is one of seven Global Institutes at Imperial College London. The institute was established to address global energy challenges ...

During his time at Imperial College, Karl immersed himself in studying crucial energy verticals, gaining a deep understanding of low carbon technologies, sustainable transport, synthetic ...

Bioenergy and Hydrogen form the basis of this module, in which raw biomass can be converted into "drop-in" gaseous, liquid, and solid energy carriers. Additionally, issues related to storage, ...

We develop new and advanced methods to sustainably extract and produce low-carbon energy, and for energy storage and decarbonisation. Our research seeks to improve the sustainability ...

Delighted to have received both my degree - a Master of Science in Petroleum Engineering with Distinction from Imperial College London - and the Diploma of the Imperial College (DIC) this ...

Postgraduate taught MSc Geotechnical Engineering with Offshore Renewables Specialise in geotechnical engineering principles and apply them to offshore renewable energy infrastructure.

Postgraduate taught MSc Geo-Energy with Machine Learning and Data Science Develop the essential data science and machine learning skills needed to embark on a career as a ...

In order to meet the challenges of development of energy storage technologies for sustainable energy

Imperial college master of energy storage

production (solar and wind, etc), and fast-growing needs of renewable chemical and ...

He was previous a post-doctoral research associate in the department of Earth Science and Engineering at Imperial College London working on large scale energy storage systems.

About The Sustainable Energy Futures MSc course from Imperial provides a grounding in the major features of global energy issues, sustainable energy technologies, and their interactions ...

The role of battery technology in achieving net-zero and supporting sustainable energy goals. Applications of batteries in home energy storage and electric vehicles (EVs). Strategies to ...
