Can Vena Energy develop local production lines in Indonesia?

JAKARTA, Indonesia, Aug. 9, 2023 /PRNewswire/-- REPT BATTERO and renewable energy company VENA ENERGY have officially signed a framework agreement to explore opportunities in establishing local production lines for energy storage components in Indonesia.

What is Indonesia's energy supply in 2021?

In 2021, Indonesia's total energy supply (TES) comprised 30.3% coal, 28.9% oil, and 14.4% natural gas. Renewable energy sources also added to the mix, with biofuels and waste accounting for 13.8%, wind and solar providing 11.6%, and hydro contributing 0.9%.

Who is Vena Energy?

Vena Energy has been supporting Indonesia in its green energy transformation journey since 2015, having commissioned five solar and onshore wind projects totalling 114 MW.

Does Indonesia have a tidal power plant?

The Alas Strait, a 50km stretch of ocean between Lombok and Sumbawa Island, alone could potentially yield 640 GWh of energy annually from tidal power. As of 2023, despite evidence of great potential, no Indonesian tidal power facilities have been developed. Much of the energy in Indonesia is used for domestic transportation.

What are some renewable projects in Indonesia?

Indonesia has several high-profile renewable projects, such as the wind farm 75 MW in Sidenreng Rappang Regency, another wind farm 72 MW in Jeneponto Regency, and Cirata Floating Solar Power Plant in West Java with a capacity of 145 MW which will become the largest Floating Solar Power Plant in Southeast Asia.

How much electricity does Indonesia have in 2022?

In 2022, Indonesia had an electrical capacity of 81.2 GW with a projected capacity of 85.1 GW for 2023. In 2021, Indonesia's total energy supply (TES) comprised 30.3% coal, 28.9% oil, and 14.4% natural gas.

Coal accounted for over 66% of Indonesia's total electricity generation in 2023. Reliance on coal for economic reasons and energy security has been a barrier. Indonesia is expected to abandon its renewable energy target of 23% by 2025 and reduce it to 17%-19% in 2025. Despite policy commitments towards renewable energy, implementation lags.
