How much does a solar system cost in New Jersey?

Compare Quotes From Top-rated Solar Panel Installers In New Jersey, the average cost of installing a residential solar system is \$2.75 per watt, or \$13,750 for a 5-kW system, before any tax credits or incentives are included. A solar panel system of 5 to 8 kW is a good size for most New Jersey homeowners.

What solar incentives are available in New Jersey?

The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage. Some states and utility companies offer additional solar incentives, saving homeowners even more money. Here are the solar incentives available in New Jersey:

Does New Jersey have a solar credit program?

New Jersey offers tax incentives and rebates to encourage residents to participate in its clean energy initiatives, making the switch to solar power more affordable and appealing. Residents of New Jersey can take advantage of the federal solar credit program, which has undergone recent changes.

Are solar loans a good idea in New Jersey?

Solar loans are popular among homeowners because you don't have to have the money for the installation upfront, but you get better lifetime savings than with a leased system. You also get to directly use the incentives (tax credits, rebates, etc.) available in New Jersey, rather than a leasing company retaining them.

Which company should I choose for solar in New Jersey?
