Is BASF launching a new NaS battery?

BASF Stationary Energy Storage, a subsidiary of chemical company BASF, and Japanese ceramics manufacturer NGK Insulators have launched a new version of their sodium-sulfur (NAS) batteries. The containerized NAS Model L24 battery jointly developed by the partners, whose cooperation started in 2019, boasts a few technological improvements.

Are NaS batteries safe?

NAS batteries have an elaborated safety concept which underwent extensive testing with third parties. That includes a work carried out by NGK with the Japanese Hazardous Material Safety Techniques Association and a safety audit conducted by TÜV Rheinland in 2019.

Are NaS batteries cost-competitive?

Besides the stability of raw materials pricing and their ideal technological fit for applications of 6 hours and beyond, another important aspect of the NAS battery's cost-competitiveness is low Opex: Arriving on site in containerised form, the systems are simple and quick to install.

BASF Stationary Energy Storage GmbH and NGK INSULATORS, LTD. have released an advanced container-type NAS battery (sodium-sulfur battery) *1.. NGK and BASF jointly developed the new product NAS MODEL L24. Specifically, it offers a significantly lower degradation rate of less than 1 % per year thanks to reduced corrosion in battery cells. In ...

German chemicals company BASF's subsidiary BNB has installed and switched on an energy storage system comprising four NAS battery containers, which have been integrated into the electricity grid at BASF's Verbund site in Antwerp, Belgium. NAS batteries are sodium-sulfur batteries with high energy content that are designed for stationary electricity storage.

Ludwigshafen, Germany, and Nagoya, Japan, June 10th, 2024 - BASF Stationary Energy Storage GmbH, a wholly owned subsidiary of BASF, and NGK INSULATORS, LTD. (NGK), a Japanese ceramics manufacturer, have released an advanced container-type NAS battery (sodium-sulfur battery).

This deployment of a NAS battery system at BASF in Schwarzheide will allow electricity stored in the NAS batteries during periods of surplus solar energy to be discharged during times of solar energy's deficit. Therefore, the NAS battery system will enable renewable energy to be used in some manufacturing processes at the Schwarzheide site ...

The NAS battery, manufactured by NGK Insulators Ltd. in Japan and distributed globally by BASF Stationary Energy Storage GmbH, is made up of molten sodium and sulfur electrodes as the basis of its technology. This offers six or more hours of continuous battery discharge, which can support 24/7 carbon

Kazakhstan basf nas battery

neutral operations for large commercial ...

"The BASF NAS® Battery is a globally mature, long duration energy storage technology capable of supporting 24/7 carbon neutral operations. Applying this technology, Allset Energy has developed an Australian Standards-compliant, integrated solution for the local market.

BASF's recently-created subsidiary is focused on finding new areas for the German chemical company to diversify into that nonetheless relate to its core business activities. BASF New Business (BNB) has a distribution and sales deal in place with Japan's NGK for the NAS batteries. ... The NAS battery technology was used in a project in Abu ...

We, the team of BASF Stationary Energy Storage, fully support you in finding the appropriate energy solution for your individual use case. We are selling stationary storage batteries based ...

Since then, Energy-Storage.news has reported on various projects announced by both NGK and BASF, including a 3.6MWh NAS battery for Mongolia's first solar-plus-storage project, a 950kW / 5.8MWh system at a BASF production facility in Antwerp, Belgium, and various deployments in Japan and South Korea.

BASF Stationary Energy Storage GmbH, a wholly owned subsidiary of BASF, and NGK INSULATORS, LTD. (NGK), a Japanese ceramics manufacturer, have released an advanced container-type NAS battery (sodium-sulfur battery). (Earlier post.)The new product NAS MODEL L24 has been jointly developed by NGK and BASF and is characterized by a ...

BASF : NAS® battery system starts up at BASF's Antwerp Verbund site September 30, 2021 at 04:12 am EDT ... (BNB) has successfully started up a system comprising four NAS ® battery containers, which have been integrated into the electricity grid at BASF's Verbund site in Antwerp, Belgium. With this long-term project in Antwerp, ...

With its capability to discharge for 6-8 hours, NAS ® batteries are ideally suitable for long duration applications such as time shift or peak shaving, but also for grid upgrade deferral.

BASF Stationary Energy Storage and NGK INSULATORS have released an advanced container-type sodium-sulfur battery, the NAS MODEL L24. New product NAS MODEL L24 is characterized by significantly reduced ...

BASF New Business GmbH (BNB), a wholly-owned subsidiary of the German chemical group BASF, and Japanese ceramics manufacturer NGK Insulators, Ltd. (NGK) reported that the companies have signed a sales partnership agreement. The agreement gives BNB non-exclusive rights to sell NGK's sodium-sulfur-based

NAS battery through BASF's global sales ...

The new "advanced" version of the sodium-sulfur (NAS) battery, first commercialised by Japanese industrial ceramics company NGK more than 20 years ago, offers a 20% lower cost of ownership compared to previous ...

BASF Stationary Energy Storage GmbH, a wholly owned subsidiary of BASF, and NGK INSULATORS, LTD., a Japanese ceramics manufacturer, have released an advanced container-type NAS battery (sodium-sulfur battery) *1. The new product NAS MODEL L24 has been jointly developed by NGK and BASF and is characterised by a significantly lower ...

NAS#174; Battery - a proven and reliable system Dr. Heike Pfistner. Ludwigshafenam Rhein | May 2021. BASF 2020 at a glance. We create chemistry for a sustainable future. Our chemistry is used in. almost all industries. 6 Verbundsites. and. 241 other production sites. 5/13/2021@ BASF New BusinessGmbH.

Development of sales pipeline of energy storage in the region and manage from contact to execution of the battery projects. Main Responsibilities & Key Activities: Take responsibility for financial performance to achieve agreed targets regarding ...

BASF Stationary Energy Storage, a subsidiary of chemical company BASF, and Japanese ceramics manufacturer NGK Insulators have launched a new version of their sodium-sulfur (NAS) batteries.

BASF's chemical expertise and our know-how in the design and production of battery modules and systems complement each other perfectly here," adds Tatsumi Ichioka, General Manager of the NAS ® battery division at NGK. NGK's NAS ® battery is the world's first commercialized megawatt-class battery which has the capacity to store large ...

BASF in recent years became both an investor in and then customer to flow battery company ESS Inc and recently also was announced as customer to a battery-gas turbine hybrid project from Siemens for one of the chemical company's manufacturing facilities. Through BASF New Business, the company seeks potential scalable commercial opportunities ...

BASF Stationary Energy Storage GmbH and NGK INSULATORS, LTD. have released an advanced container-type NAS battery (sodium-sulfur battery) *1. NGK and BASF jointly developed the new product ...

Juni 2024 - BASF Stationary Energy Storage GmbH, eine hundertprozentige Tochtergesellschaft der BASF, und NGK INSULATORS, LTD., ein japanischer Keramikhersteller, haben eine verbesserte NAS-Batterie (Natrium-Schwefel-Batterie) auf den Markt gebracht.

The NAS battery operates at a temperature of about 300°C, can operate for about 15 years without experiencing cell degradation, even with 100% depth of discharge cycling every day. ... BASF New Business,

Kazakhstan basf nas battery

the arm which partnered with NGK, switched on a 950kW/5.8MWh NAS battery storage system at a BASF production facility in Antwerp, ...
