Last mile energy Saint Lucia

Electrifying last-mile delivery is an obvious choice in the context of energy crises and the urgent need to make energy use more efficient. With increasing availability of different models, the business case is becoming more and more promising, in particular if helped by purchase incentives and local emissions charges on diesel trucks.

We have been committed to e-mobility and smart energy management since 2007, years before the first electric cars hit the road. With more than 147,000 connected charge points, 817,000 charging cards and users in 22 countries, we have grown into the largest independent provider of e-mobility platforms in Europe. ... We are Last Mile Solutions ...
