Structural battery packs Structural battery packs are the next step toward massless energy storage in EVs and electric aircraft applications. Massless energy storage refers to any approach where the battery pack or battery is an integral element in the structural design, effectively reducing the impact of the inactive materials in the energy storage system and ...

In 2011, Inventus Power's innovation allowed us to help replace that burden with the original 150Wh Conformal Wearable Battery, pushing the envelope in advanced lithium-ion technologies and becoming the first "and still only" company to offer a fully qualified lithium-ion battery pack that was lightweight, powerful, safe, and ergonomic.

Of these, unfavorable thermal conditions may be the most common reason for sub-par battery pack performance. This article explains how passive thermal management in Li-ion battery packs promotes optimal pack performance. It also describes some practical and effective passive thermal management techniques.
