

The phenomenal growth of sales of portable lighting products in Africa has caught the attention of multinationals such as TOTAL, Philips and Schneider Electric, and drawn them into a market that has been largely dominated by social entrepreneurs. Oil producer and marketer TOTAL, which boasts an extensive distribution network with 3,500 retail service ...

Early Support for Off-Grid Solutions With support from the government, momentum of the off-grid solar lighting and energy market in Burkina Faso has been steadily growing over the past decade. In 2009 the "Une lampe pour l'Afrique" project, aimed at distributing solar lamps among schools, was launched by the Taiwanese Development Cooperation; The 2013 budget

Today, there are about 733 million people worldwide living without access to electricity - down from 1.2 billion in 2010. Despite this significant increase, at the current rates of progress, the world will reach only 92 percent electrification by 2030 - falling far short of the SDG7 goal of universal energy for all by 2030.

For over a decade, the Lighting Global operated the foundational quality assurance program for the off-grid solar industry. By working with the sector to set quality standards, promote durable off-grid products, and adopt harmonized policies, Lighting Global Quality Assurance instilled confidence in what was once a nascent and unproven industry.

Sierra Leone to benefit from US\$200 million electrification project. Sierra Leone is among nineteen countries in West Africa that will benefit from a regional off-grid electrification project that will provide beneficiary countries with needed support to foster a sustainable ...[Read More](#)

The objective of the Regional Off-Grid Electrification Project (ROGEP) is to provide targeted West African countries with needed support to foster a sustainable and scalable off-grid electrification market to meet the electrification needs of unserved populations. ROGEP The Regional Off-Grid Electrification Project (ROGEP) will aim to increase electricity access to households, ...

Lighting Lives in Liberia. The Lighting Africa Lighting Lives in Liberia project was launched in 2012 in response to the acute lack of energy access across the country. With only 1.2% of the rural population connected to the grid, the need for off-grid lighting and ...

Lighting Africa has looked into the policy barriers to the adoption of modern lighting products and services, and recommendations for their mitigation in eight countries: Cameroon, Democratic Republic of the Congo (DRC), Ethiopia, Ghana, Kenya, Rwanda, Senegal, and Tanzania. Policy-related issues have been identified by the lighting industry as key ...

The 2020 Off-Grid Solar Market Trends Report finds that the industry has made tremendous strides in the past decade. Since 2017, revenues from the off-grid solar industry continue to rapidly grow, increasing by 30 percent annually. To date, more than 180 million off-grid solar units have been sold worldwide and the sector saw \$1.5 billion in investments since ...

The Lighting Africa - Nigeria program was launched in March 2015 to increase access to better, cleaner and safer off-grid lighting and energy products for the rural and peri-urban populations with no access to the grid. Our key objectives from the outset of the program were to help six million people gain access to clean,

As one of the poorest countries in the world, end-users in Niger largely lack the funds to purchase solar products. Lighting Africa has been working to address barriers on the supply-side so as to increase access and affordability to consumers. Until recently high import taxes drove up the costs to end-users, while poor-quality products dominated

With 189 member countries, staff from more than 170 countries, and offices in over 130 locations, the World Bank Group is a unique global partnership: five institutions working for sustainable ...
