

Mobile solar power plant Svalbard and Jan Mayen

Could a new solar project help remote Arctic communities transition to green energy?

Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago, a region plunged in round-the-clock darkness all winter. The pilot project could help remote Arctic communities transition to green energy.

Where is a solar farm located in Norway?

State-owned energy company Store Norske Energi installed the solar and storage at Isfjord Radio on the island of Spitsbergen, the largest and the only permanently populated island in the archipelago, and the solar farm is expected to come online tomorrow.

Are Longyearbyen and Svalbard facing an energy transition?

Top image: Longyearbyen and Svalbard are facing an energy transition. This is the background for the cooperation agreement between UNIS, Store Norske and SINTEF. Photo: Graham Gilbert/UNIS. Longyearbyen and Svalbard are facing a huge energy transition.

Does Isfjord Radio have a solar farm?

The off-grid Isfjord Radio's new ground-mounted solar farm joins its rooftop solar, which was installed earlier this year. The ground-mounted solar farm sits at 78° north, which makes it the world's northernmost solar farm. Store Norske hasn't yet provided details on the specs of the solar panels or battery storage.

Why do solar panels work in Isfjord Radio?

The solar panels also benefit from the "albedo" effect, the reflective power of snow and ice, as well as low temperatures that improve their efficiency. On the flipside, the region is plunged into total darkness from early October until mid-February, which makes it impossible for Isfjord Radio to completely give up fossil fuels.

What is Unis & Svalbard Energi doing in the Arctic?

The energy company is collaborating with the University of Svalbard (UNIS) and Svalbard Energi in the testing of hybrid renewable energy, battery storage, and diesel generator systems, with a plan to implement them in many of the 1,500 Arctic communities that are off-grid and currently use coal or diesel as an energy source.

The FPV is on 180,000m² (over 44 acres) of surface area, using 50,904 Kyocera solar modules for an estimated 16,170 megawatt hours (MWh) per year of electricity generation.

PV Tech has been running PV ModuleTech Conferences since 2017. PV ModuleTech USA, on 17-18 June 2025, will be our fourth PV ModuleTech conference dedicated to the U.S. utility scale solar sector.

All power sockets in Svalbard and Jan Mayen provide a standard voltage of 230V with a standard frequency of 50Hz. You can use all your equipment in Svalbard and Jan Mayen if the outlet voltage in your own country is between 220V-240V. This is the case in most of Europe, Australia, the United Kingdom and most countries in Africa and Asia. ...

A wet day is one with at least 0.04 inches of liquid or liquid-equivalent precipitation. In Longyearbyen, the chance of a wet day over the course of the summer is very rapidly increasing, starting the season at 10% and ending it at 25%. For reference, the year's highest daily chance of a wet day is 27% on September 24, and its lowest chance is 9% on May 28.

Facebook users in Svalbard and Jan Mayen in 2024. Data published in Meta's advertising resources indicates that Facebook had 400 users in Svalbard and Jan Mayen in early 2024. However, Meta has made important changes to the way its advertising resources report audience reach data over recent months - including making significant revisions to its base ...

The Mobile Power Plants Market size is projected to reach US\$ 2.75 billion by 2031 from US\$ 1.90 billion in 2023. The market is expected to register a CAGR of 4.6% in 2023-2031.

Both Svalbard and Jan Mayen consist almost entirely of Arctic wilderness, such as at Bellsund in Svalbard. Svalbard is an archipelago in the Arctic about midway between mainland Norway and the North Pole. The group of islands range from 74° to 81° north latitude, and from 10° to 35° east longitude. [1] [2] The area is 61,022 square kilometres (23,561 sq mi) and there were 2,595 ...

Mobile solar power plant Svalbard and Jan Mayen

Wind and solar work well together in the Arctic, since in the darkest winter months, wind can produce plenty of clean energy. In the summer, solar takes full advantage of the Midnight Sun - 24 hours of daylight. A fourth phase of installing PV at the airport is planned for 2020/2021, when the total installed solar power will be quadrupled.

Svalbard and Jan Mayen offer an unparalleled encounter with the Arctic's untamed beauty - a journey through snow-capped mountains, icy fjords, and a world of rare wildlife. These lands invite adventurers to embark on an Arctic expedition, witnessing the wonders of nature in its purest form, leaving an indelible mark of awe and reverence for the ...

More and more Solar Well pumps are being installed in America to pump water with solar for Livestock, farms and off-grid use. ... Svalbard & Jan Mayen (USD \$) Sweden (USD \$) Switzerland (USD \$) Taiwan (USD \$) ... FARM + RANCH MOBILE POWER SOLUTION. THE GAS-FREE MOBILE GENERATOR OF THE FUTURE.

Article source: LPO arkitekter Ny-#197;lesund is a research town on the island of West Spitsbergen of Norwegian archipelago Svalbard. This is the northernmost settlement on Earth with a permanent population of 30-35 people, which increases in the summer to 120. Ny-#197;lesund was founded as a settlement of coal miners in 1917, but in the 1960s [...]
