The new "family-sized" smart battery, which will be showcased at Solar & Storage Live next week, is the company"s largest following its 2kWh and 3kWh systems, and is intended to reflect the emerging energy tariffs that ...

GridShare is a customer scheme designed to give every qualifying Moixa battery customer cash back, in return for Moixa intelligently managing their batteries. Using the "smart brain" built into every Moixa Battery, our GridShare helps to balance the energy demands of the National Grid, whilst letting all participants cash in on the system.

GridShare is the software that puts the "smart" in a Moixa Smart Battery or to the Moixa Hub in a Moixa Optimised Battery System.. For homes on a time-of-use tariff, GridShare can identify a home"s energy generation and consumption patterns, look at weather forecasts and review the home"s energy tariff.

As standard, your Moixa Smart Battery only charges when there is surplus energy available from your PV panels. When your household consumption is higher than your PV generation all the solar power will used in the home leaving none spare to charge your battery. If there is excess solar available but your battery does not
