VDE-AR-E 2510-50:2017-05. No decision rule is specified by standard, when comparing the measurement result with the applicable limit according to the specification in that standard. The decisions on conformity are made without applying the measurement uncertainty ("simple acceptance" decision rule, previously known as "accuracy method").

The application guide VDE-AR-E 2510-50 specifies the safety requirements for stationary battery energy storage systems (BESS) with lithium batteries. This application guide applies only for battery energy storage systems (BESS) with batteries based on Li-ion cells.

These include, for example, VDE AR-E 2510-2 and VDE AR-E 2510-50, which in turn refer to diverse guidelines depending on the subcomponent. The type of power supply connection is required in the respective countries depending on the connection area, for example according to VDE AR-N 4105 (LV) or according to VDE AR-N 4110 (MV).
