What energy sources are available in Mozambique?

Mozambique has abundant energy sources available for exploitation. As of 2021, the country was ranked first in energy potential of all the countries in the Southern African Power Pool (SAPP), with an estimated energy capacity of 187,000 MW. Available energy sources include coal, hydroelectricity, natural gas, solar energy and wind power.

Why is energy important in Mozambique?

The energy sector is key to the country's economy already today, since energy exports make up a large share of total foreign exchange earnings. Moreover, the availability of cheap electricity is one of the main reasons for the significant foreign direct investment in energy-intensive industries in Mozambique.

How much electricity does Mozambique use a year?

In 2018, with an "average operating generation capacity of 2,279 MW", the country had an electricity consumption of 415 kWh per person, per year, about 50 kWh higher than the then prevailing average for Sub-Saharan Africa. It is estimated that 85 percent of electricity consumption in Mozambique is consumed by industry.

How much solar energy does Mozambique have?

Mozambique has a potential solar energy yield estimated between 1,785 and 2,206 kWh/m²/year, resulting in a solar energy potential of 23,000 GWh/year. In August 2019, the first grid-ready solar power station, the 40 megawatts Mocuba Solar Power Station, in Mocuba District, Zambezia Province, achieved commercial commissioning.

How many hydropower stations are there in Mozambique?

There are over 3,400 megawatts of hydropower stations in the pipeline in Mozambique, the majority planned across the Zambezi River, including the 1,500 megawatts Mphanda Nkuwa Hydroelectric Power Station and the proposed 1,245 megawatts extension to the CBHPS.

October 24, 2024.
