In Ethiopia, main biomass based energy sources are fuel wood, dung and crop residues (Eshete et al., 2006, Gwavuya et al., 2012). Especially the utilization of dried cattle dung cakes as solid fuel for household cooking stoves is very common in some rural areas of the country as it is also reported from several other developing countries like ...

Regarding the factor in determining the energy and energy appliance type choice, accessibility is found as the major reason. The type of energy sources and energy technologies utilized for cooking and lighting have their own effect on health, environmental degradation, and overall economic development.

1 · 17 August 2024 was a momentous day for the energy sector in Ethiopia. AMEA Power moves forward with the AyshaI windpower project in Ethiopia. It signed a power purchase agreement [PPA] and
